

Equal Employment Opportunity File

Based on ACS 2006-2010; released November

Available through AFF

Similar to the 2000 EEO file except this one will contain MOEs; some tables will include an additional characteristic – citizenship

Based on the 2010 Standard Occupation Classification categories

Characteristics will include sex, race, and Hispanic origin, cross tabulated by a combination of other characteristics:

- U.S. citizenship
- Occupation
- Industry
- Age
- Educational attainment
- Median Earnings

Geography

- Tables will be tabulated for at least one of three geographic types:
 - Worksite
 - Residence-to-worksite commuting flow
 - Residence
- Tables will be tabulated for one or more of the following geographic summary levels:
 - U.S. Total
 - All states and the District of Columbia
 - Core Based Statistical Areas (CBSAs)
 - Counties
 - County sets (counties with residence populations of 50,000 or more or aggregations of counties that together have a population of 50,000 or more)
 - Places
- Population thresholds apply to all summary levels except for U.S. Total and States
 - Population thresholds are either 50,000 or 100,000, depending on specific table content.
 - Population thresholds are based on residence population
