**Source & Explanations:**

Prepared by the Maryland Department of Planning, State Data and Analysis Center, January 2026

Source: U.S. Census Bureau, 2024 American Community Survey 5-Year Estimates

**Explanation of Symbols:**

1. (-) The estimate could not be computed because there were an insufficient number of sample observations. For a ratio of medians estimate, one or both of the median estimates falls in the lowest interval or highest interval of an open-ended distribution. For a 5-year median estimate, the margin of error associated with a median was larger than the median itself.
2. (N) The estimate or margin of error cannot be displayed because there were an insufficient number of sample cases in the selected geographic area.
3. (X) The estimate or margin of error is not applicable or not available.
4. median- The median falls in the lowest interval of an open-ended distribution (for example "2,500-")
5. median+ The median falls in the highest interval of an open-ended distribution (for example "250,000+").
6. \*\* The margin of error could not be computed because there were an insufficient number of sample observations.
7. \*\*\* The margin of error could not be computed because the median falls in the lowest interval or highest interval of an open-ended distribution.
8. \*\*\*\*\* A margin of error is not appropriate because the corresponding estimate is controlled to an independent population or housing estimate. Effectively, the corresponding estimate has no sampling error and the margin of error may be treated as zero.
