1 Introduction

1.1 The American Community Survey

The American Community Survey (ACS) is a household survey conducted by the U.S. Census Bureau that currently has an annual sample size of about 3.5 million addresses. ACS estimates provides communities with the current information they need to plan investments and services. Information from the survey generates estimates that help determine how more than \$400 billion in federal and state funds are distributed annually. Each year the survey produces data that cover the periods of 1-year, 3-year, and 5-year estimates for geographic areas in the United States and Puerto Rico, ranging from neighborhoods to Congressional districts to the entire nation. For more information about the ACS, please visit our home page, www.census.gov/acs. ACS tables are published on the Census Bureau's American FactFinder (AFF) website, factfinder2.census.gov, and are available for download in several forms. This document will brief data users on the contents of the ACS Summary File and explain how they can use it to obtain the 5-year estimates.

1.2 The American Community Survey Summary File

The American Community Survey Summary File (ACSSF) is a unique data product that includes all the estimates and margins of error from the Detailed Tables and geographies that are published for the ACS. Other ACS data products such as Subject Tables and Data Profiles are created from the Detailed Tables and are therefore not available in the Summary File.

Since the Detailed Tables contain a large number of cells, the tables are stored in a series of files with only the data from the tables, without such information as the title of the tables, the description of the rows, and the names of the geographic areas. That information is in other files that the user must merge with the data files to reproduce the tables.

The ACS Summary File data files are in American Standard Code for Information Interchange (ASCII) format. The files are divided into three types:

- Geographies – (position based and comma delimited)
- Estimates – (comma delimited)
- Margins of Error – (comma delimited)

[Chapter 2](#) discusses each component in detail and explains how to put them all together.

1.3 Topics and Geographies Covered

Data contained in the ACS Summary File cover demographic, social, economic, and housing subject areas. All Detailed Tables for the 2006-2010 ACS 5-year estimates are in the Summary File and are listed in [Appendix E](#).

The published ACS Summary File geographies cover areas that are based on “summary levels”. A summary level specifies the content and the hierarchical relationships of the geographic elements that are required to tabulate and summarize data. For example, summary level code “040” represents the U.S. States, Washington D.C., and Puerto Rico; while summary level code “050” represents counties and county equivalents within states.

In addition to the ACS 1-year and 3-year summary levels, additional summary levels are included in the 5-year estimates, including census tracts and block groups, and additional information for geographies such as American Indian areas, core based statistical areas, combined statistical areas, Congressional districts and state legislative districts. See the full list of summary levels published for the 5-year Detailed Tables in [Appendix F](#). For the 2006-2010 ACS 5-year data release, data for census block groups are not published on American FactFinder and are only available using the ACS Summary File. The list of tables in [Appendix E](#) shows which tables are available at the block group level.

Many resources are available to help users understand the ACS geographic terms and concepts. For additional information, please visit www.census.gov/geo/www/reference.html and www.census.gov/acs/www/guidance_for_data_users/geography/. Users may also find the full list of summary levels published for the 5-year Detailed Tables in [Appendix F](#).

1.4 Tools for Obtaining Data

Since using the ACS Summary File can be challenging, users should first check if their tables of interest are available for download on American FactFinder. Below are some other options to help users retrieve the tables they want. They are listed in order based on ease of use.

- Summary File Excel Retrieval Tool

The Summary File Excel Retrieval Tool is a macro-driven Excel spreadsheet that provides a method to easily retrieve a table for the nation, states, and all of the geographic areas in a state (or for all cross-state geographic areas such as metropolitan statistical areas or census regions). This tool is designed to be easy to use, and does not require any programming experience. There is a drop down menu from which the user can select the state for the table and receive data for all geographies within the state. One key requirement is that Microsoft Excel 2007 or newer is needed. Other hardware and software requirements for the tool are listed in [Chapter 3.1](#). For more information about the application, visit the ACS Summary File page at www.census.gov/acs/www/data_documentation/summary_file/.

- Summary File DataFerrett Tool

DataFerrett is a tool provided by the Census Bureau to help users view, download, and manipulate a wide variety of data sets to suit their needs. Among the features provided by this tool is the ability to construct user-defined variables from the variables on the input data file(s), the ability for users to exclude data that is not of interest, a variety of options for downloading data, and the ability to create complex tabular reports from the data including graphs and thematic maps. The initial release of the 2006-2010 ACS Summary File data in DataFerrett focuses primarily on the display and download capabilities of DataFerrett. This tool will be ideal for data users who wish to view, customize, and restrict the data that is downloaded from the 2006-2010 ACS Summary File.

- Summary File Excel Import Tool

The Summary File Excel Import Tool is a replicate of the Excel templates that Census 2000 provided for the SF3 summary file release. The Excel Import Tool provides a basic layout of each sequence in Excel in the same format as the estimate and margin of error files are formatted. For individuals that do not have Excel 2007 or later and are unable to use the Excel Retrieval Tool, the Excel Import Tool provides an alternative option to read the summary file into Excel. For more information on this tool, see [Chapter 3.3](#).

- SAS Programs

There are two programming options for SAS users. The first option is a set of individual SAS programs, one for each summary file by geography and sequence. These programs are best for users only interested in looking at a specific sequence for a specific geography. The second option is a single SAS program that is parameterized to allow users to read in any sequence for any geography into SAS. This program can also be used to read the entire summary file into SAS, and is designed for users looking for a large amount of data. For more information on these programs, see [Chapter 3.1](#).

1.5 Notable Changes to the Summary File

The files for the 2006-2010 ACS 5-year estimates are similar to last year's publications (the 2009 ACS 1-, 3-, and 5-year estimates) with the following exceptions. These changes were established starting with the 2010 ACS 1-year release:

- All Detailed Tables Available in American FactFinder

In the 2005-2009 ACS 5-year data release, 295 Detailed Tables were only available for download in the Summary File; they were not available in American FactFinder (AFF). For the 2006-2010 ACS 5-year data release, all Detailed Tables are available in AFF.

- New Geography Levels Available

Although the ACS continues to produce block group level estimates on the summary file only, the 2006-2010 ACS 5-year estimates include 6 new summary levels for Native American Tribal Areas:

- American Indian Area—Tribal Census Tract (256)
- American Indian Area—Tribal Census Tract—Tribal Block Group (258)
- American Indian Area (Reservation Only)—Tribal Census Tract (291)
- American Indian Area (Off-Reservation Trust Land Only)—Tribal Census Tract (292)
- American Indian Area (Reservation Only)—Tribal Census Tract—Tribal Block Group (293)
- American Indian Area (Off-Reservation Trust Land Only)—Tribal Census Tract—Tribal Block Group (294)

These summary levels were not available in previous years, the 2010 ACS 1-year estimates, or the 2008-2010 ACS 3-year estimates. Learn more about summary levels in [Appendix F](#).

- **Geography Files Offered in Comma Delimited Format**

The geography files are now offered in two formats: position based and comma delimited. In previous years, the geography files were only offered in position based format.

- **SummaryFileXLS.zip Renamed to SummaryFileTemplates.zip**

The zipped “SummaryFileXLS” folder was renamed to “SummaryFileTemplates” to more accurately reflect its contents: templates (or column headers) for each of the sequence files. This folder is located in the “User Tools” folder on the Summary File site: www2.census.gov/acs2010_5yr/summaryfile/UserTools/.

- **SummaryFileTemplates.zip Includes a Template for the Geography File**

A template for the geography file was added in the “SummaryFileTemplates” zipped folder due to popular demand. For more information, visit [Chapter 2.4](#).

- **Missing Value Has Been Changed From Dot to Empty Cell**

Previously, a dot “.” was used to indicate that an estimate was unavailable due to coefficient of variation (CV) filtering or Disclosure Review Board (DRB) restrictions. For the 2010 ACS Summary Files, the dot is being replaced by an empty cell. For more information, visit [Appendix C.3](#).

- **Instructions Added on How to Join the Summary File to TIGER/Line Shapefiles**

The Summary File Technical Documentation now includes instructions on how to join the ACSSF to TIGER/Line Shapefiles. For more information, visit [Chapter 2.6](#).

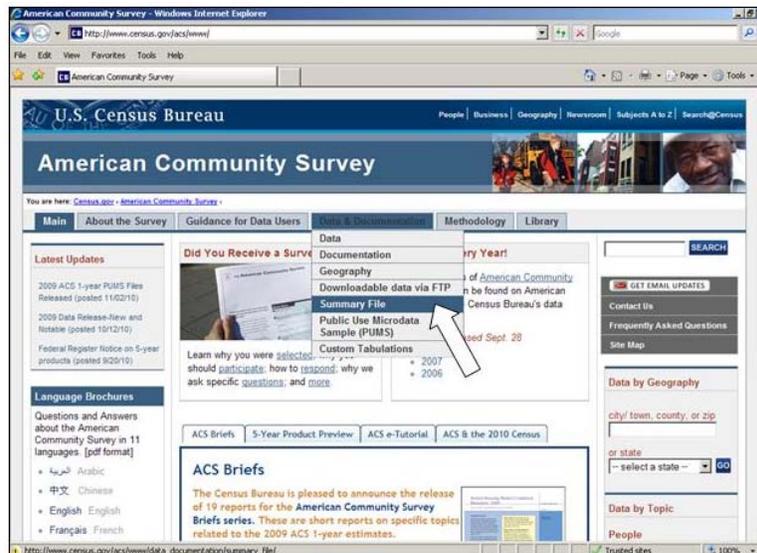

1.6 Contact Us

Please send any technical questions or comments on the ACS Summary File you have via email to: acso.users.support@census.gov. If you have questions or comments about the American Community Survey, you can submit a question online at ask.census.gov/.

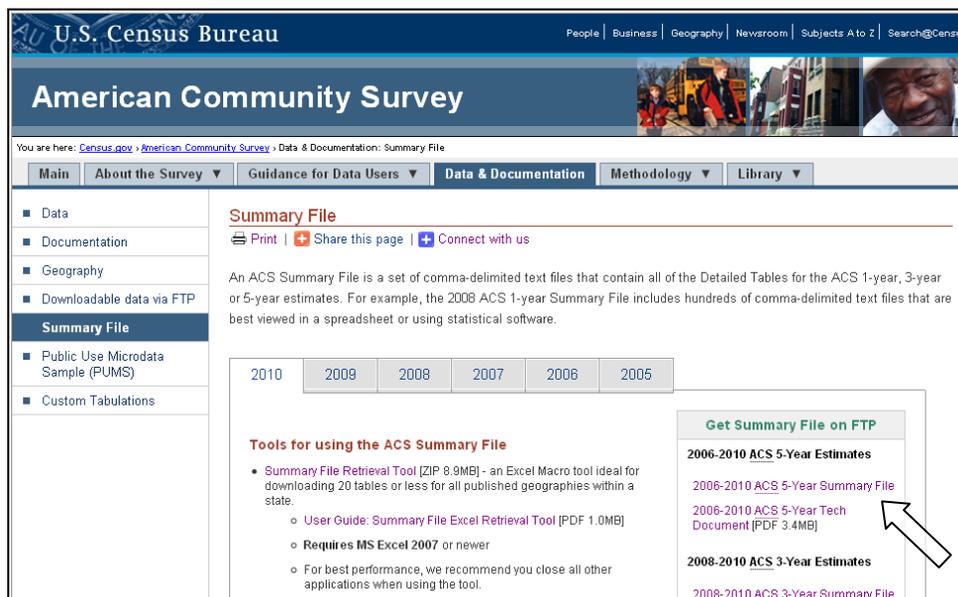

2 How to Use the ACS Summary File

2.1 Locating the Summary File

The 2006-2010 ACS 5-year Summary File is accessible from the American Community Survey home page. From the ACS home page, www.census.gov/acs, click on the **Data and Documentation** tab, select the option for **Summary File**, as shown below:

That will take you to the ACS Summary File page. Click on **2006-2010 ACS 5-Year Summary File** to go to the ACS Summary file page.

Name	Last modified	Size	Description
Parent Directory		-	
2008-2010 ACSSF All In 1 Giant File(Experienced-Users-Only)/	11-Oct-2011 12:36	-	
2008-2010 ACSSF By State All Tables/	11-Oct-2011 12:41	-	
2008-2010 ACSSF By State By Sequence Table Subset/	11-Oct-2011 12:41	-	
ACS2010 3-Year TableShells.xls	14-Oct-2011 11:40	3.4M	
UserTools/	13-Oct-2011 09:53	-	

This is a screenshot of the 2008-2010 ACS 3-year Summary File page; the one for the 2006-2010 ACS 5-year Summary File looks very similar. It is actually comprised of three folders that are explained the next chapter.

2.2 Summary File Organization

The Summary File is organized in three folders as shown in the above screenshot. These three directories contain the same combination of files; they are simply arranged differently to accommodate various user needs:

- 2006-2010_ACSSF_All_In_2_Giant_Files(Experienced-Users Only)

The “All in 2 Giant Files” directory contains a zipped file, which includes geography, estimate, and margin of error files. This zipped file is ideal to download if users want estimates and margins of error for all geographies throughout the nation at once. The file is very large and should only be used by those that can easily process a very large file. For a graphical representation of this folder and its contents, go to [Appendix B.1](#).

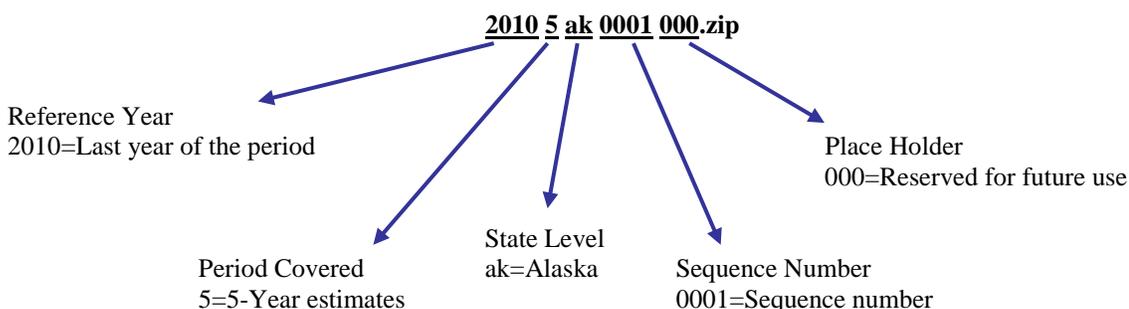

- 2006-2010_ACSSF_By_State_All_Tables

The “By State All Tables” directory contains zipped files for each state or state level equivalent--each of the 50 states, District of Columbia, Puerto Rico, as well as cross-state geographies such as metropolitan areas. Each zipped file contains a geography file and multiple estimate and margin of error files. Downloading from these state level folders is ideal if users want all the tables for a state level geography or cross-state geographies. For a graphical representation of this folder and its contents, go to [Appendix B.2](#).

- 2006-2010_ACSSF_By_State_By_Sequence_Table_Subset

The “By State By Sequence Table Subset” directory contains folders for each state or state level equivalent--each of the 50 states, District of Columbia, Puerto Rico, as well as cross-state geographies such as metropolitan areas. Within those folders are a geography file and zipped files containing the estimate and margin of error files, one per “sequence” (sequences are explained in [Chapter 2.3](#)). Downloading from these folders is ideal if users only want a few tables for a state level geography or cross-state geographies. For a graphical representation of this folder and its contents, go to [Appendix B.3](#).

The naming convention used for the zipped files in this directory is the following:

File Name: 20105ak0001000.zip		
Example	Name	Range or Type
2010	Reference Year	ACS data year (last year of the period for multiyear periods)
5	Period Covered	1=1-year, 3=3-year, 5=5-year
ak	State Level	US or abbreviations for state, District of Columbia, and Puerto Rico
0001	Sequence Number	0001 to 9999
000	Place Holder	Iteration value for future use

As [Appendix B](#) shows, the “All in 2 Giant Files” and the “By State All Tables” folders contain the same tables as the “By State By Sequence Table Subset” folder. The difference is in the organization. The “By State All Tables” zipped files contain all of the sequence files for the given state, so each zipped file contains 354 files. The “All in 2 Giant Files” zipped file contains all sequence files for all states, which is thousands of files.

As mentioned earlier, the zipped files are divided by state or state-level equivalents. Those state-level equivalents include the District of Columbia and Puerto Rico. There is also a level called “United States,” which is for summary levels that can cross state boundaries, such as the Nation, and all Regions, Divisions, Metropolitan Statistical Areas and Tribal Reservations. The United States level does not contain tables for geographies that are always entirely within a state, such as counties and places; for those tables, go to the folder or files for that state.

The following is a table that gives examples of the types of summary levels that are in the state folders and files and those that are in the United States folders and files. A complete list of all the ACS 5-year summary levels and which folder they are in can be found in [Appendix F](#).

Each State, DC, and Puerto Rico	United States
State	United States
County	Region
County subdivision	Division
Place	Metropolitan or urban statistical areas
Congressional districts (110th Congress)	New England City and Town Area (NECTA)
Public Use Microdata Area (PUMA)	American Indian/Alaska Native/Hawaiian Home Land areas
School Districts	Urban areas
Alaska Native Regional Corporation	

2.3 Sequence Numbers

Detailed Tables for similar subject areas are grouped together in “sequences”. A sequence number is an assigned number to a grouping of ACS tables, and it may change from year to year or product to product (1-, 3-, or 5- year data sets). The rules governing how many tables can be assigned the same sequence number depend on the following:

- There are no more than 256 columns per sequence, so the data can be read into a spreadsheet.
- Tables are grouped into sequences according to subject area, but they are not in numerical order (i.e., Table B00001 is not in sequence file 0001).
- Tables with race iterations are grouped in the same sequence.

It is critical to know the sequence number associated with a Detailed Table (Table ID) for two reasons. First, one needs it in order to access the correct estimates and margins of error files for the desired table. Second, the field start position for the estimates or margins of error of a certain Detailed Table depends on its sequence number.

The Sequence Number and Table Number Lookup file-- available as an Excel spreadsheet, text file, and SAS dataset-- lists Table IDs associated with each sequence number. This spreadsheet, formerly known as “merge_5_6”, is available at www2.census.gov/acs2010_5yr/summaryfile/. (The file is named “Sequence_Number_and_Table_Number_Lookup” with the “.xls”, “.txt”, or “.sas7bdat” extension.)

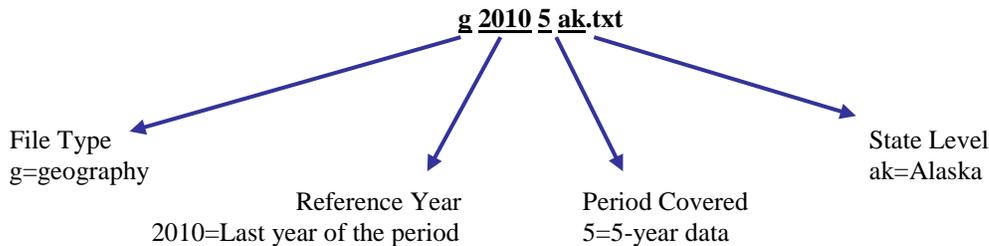

To find the sequence number associated with the table B08406, for example, a user must open and look for that Table ID in the Sequence Number and Table Number Lookup file. Shown below is a screenshot of this file, for the 2010 ACS 1-year, opened to where the “tblid” is B08406. The next column in the file, “seq”, shows that this Table ID is associated with the sequence number “0003”. In order to access the estimate and margin of error file for Table B08406, a user will need to download the estimate and margin of error files labeled with the sequence number “0003”.

	A	B	C	D	E	F	G	H	I	J	K	L	M	N

469	ACSSF	B08406	0003	22				In 2-person carpool						

2.4 Geography File

There is a geography file that comes with the estimate and margin of error files. This file begins with a “g” and is an ASCII file using either a position based format or comma delimited format. A geography file exists for each state or state level equivalent.

Geography files are named using the following convention:

File Name: g20105ak.txt		
Example	Name	Range or Type
g	File Type	g=geography
2010	Reference Year	ACS data year (last year of the period for multiyear periods)
5	Period Covered	1=1-year, 3=3-year, 5=5-year
ak	State Level	US or abbreviations for state, District of Columbia, and Puerto Rico

The geography files contain geographic information for an ACS tabulated area, including the name of the area. One variable on the file, called LOGRECNO, is the logical record number and is used to link the level of geography to the estimate and margin of error files. An example of how to use LOGRECNO is discussed in [Chapter 2.5](#).

The following table provides the layout of the geography file:

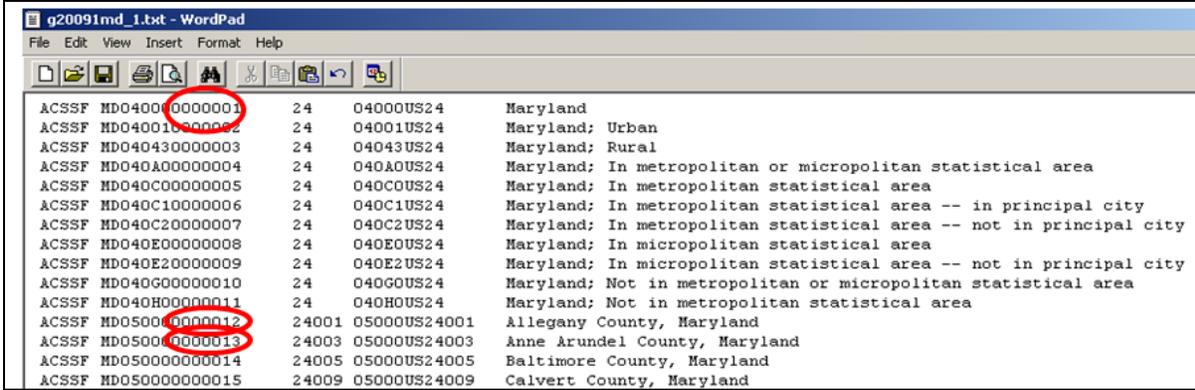

Variable Name	Description	Field Size	Starting Position	Geographic Summary Levels For 3-Year Tables
RECORD CODES				
FILEID	Always equal to ACS Summary File identification	6	1	All Summary Levels
STUSAB	State Postal Abbreviation	2	7	All Summary Levels
SUMLEVEL	Summary Level	3	9	All Summary Levels
COMPONENT	Geographic Component	2	12	All Summary Levels
LOGRECNO	Logical Record Number	7	14	All Summary Levels
GEOGRAPHIC AREA CODES				
US	US	1	21	010
REGION	Census Region	1	22	020
DIVISION	Census Division	1	23	030
STATECE	State (Census Code)	2	24	Reserved for future use
STATE	State (FIPS Code)	2	26	040, 050, 060, 160, 230, 312, 352, 500, 795, 950, 960, 970
COUNTY	County of current residence	3	28	050, 060
COUSUB	County Subdivision (FIPS)	5	31	060
PLACE	Place (FIPS Code)	5	36	160, 312, 352
TRACT	Census Tract	6	41	Reserved for future use
BLKGRP	Block Group	1	47	Reserved for future use
CONCIT	Consolidated City	5	48	Reserved for future use

BLANK		5	164	Reserved for future use
PUMA5	Public Use Microdata Area – 5% File	5	169	795
BLANK		5	174	Reserved for future use
GEOID	Geographic Identifier	40	179	All Summary Levels
NAME	Area Name	200	219	All Summary Levels
BTTR	Tribal Tract	6	419	256, 258, 291, 292, 293, 294
BTBG	Tribal Block Group	1	425	258, 293, 294
BLANK		50	426	Reserved for future use

This year, we created an Excel template for the geography file named “2010_SFGeoFileTemplate.xls”. The template provides users with two rows containing the variable names and their descriptions (as displayed in the above table) for each column in the geography file. It is meant to be used with the comma delimited version of the geography file. The template is available at www2.census.gov/acs2010_5yr/summaryfile/UserTools/ in the zipped “2010_SummaryFileTemplates” zip file. Here is a screenshot of the Excel file:

	A	B	C	D	E	F	G	H	I	J	K	L	M	
1	FILEID	STUSAB	SUMLEVEL	COMPONENT	LOGRECNO	US	REGION	DIVISION	STATECE	STATE	COUNTY	COUSUB	PLACE	TR
2	Always equal to ACS Summary File identification	State Postal Abbreviation	Summary Level	Geographic Component	Logical Record Number	US	Census Region	Census Division	State (Census Code)	State (FIPS Code)	County of current residence	County Subdivision (FIPS Code)	Place (FIPS Code)	Cer Tra
3														
4														
5														
6														
7														

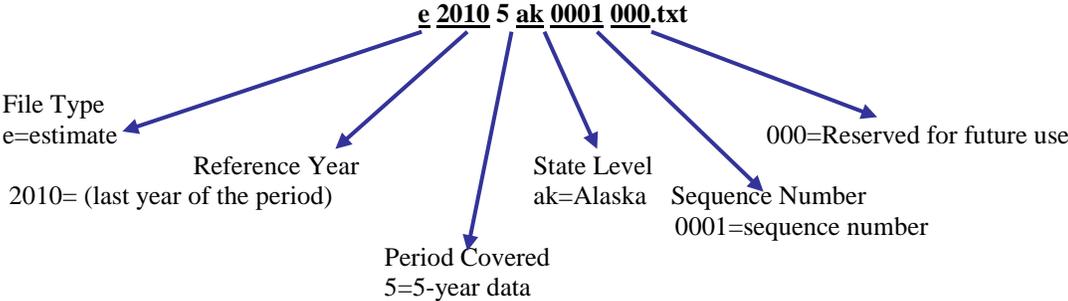

Each state, the District of Columbia, Puerto Rico and the set of cross-state geographies, have one geography file associated with them regardless of how the Summary File is accessed. For example, the following screenshot shows the beginning of the state geography file for Maryland in the 2009 1-year ACS. In the screenshot, the logical record numbers corresponding with the state of Maryland, Allegany County, and Anne Arundel County are circled. The logical record number for the state of Maryland is “0000001”, for Allegany County it is “0000012”, and for Anne Arundel County it is “0000013”.

Excess spaces in the pictured geography file have been removed for illustrative purposes.

2.5 Estimate and Margin of Error Files

Each of the three Summary File directories include zipped files containing estimate files (file names beginning with an “e”) and margins of error files (file names beginning with an “m”). The estimate files contain published ACS estimates and the margin of error files contain published ACS margins of error for their respective estimates. Here is the naming convention used for those files:

File Name: e20105ak0001000.txt		
Example	Name	Range or Type
e	File Type	e=estimate, m=margin of error
2010	Reference Year	ACS data year (last year of the period for multiyear periods)
5	Period Covered	1=1-year, 3=3-year, 5=5-year
ak	State Level	US or abbreviations for state, District of Columbia and Puerto Rico
0001	Sequence Number	0001 to 9999
000	Reserved for future use	Iteration value for future use

The estimates and margins of error for Detailed Tables are grouped together in by sequence numbers, as discussed in [Chapter 2.3](#). There is an estimate and margin of error file for each sequence number.

The format of the estimate and margin of error files are identical; they are strings of comma-delimited ASCII text. Each row represents a different geographic area and the first six fields contain metadata such as the geographic area and the sequence number. Following those fields

are the estimates or margins of error for the Detailed Tables. Starting and ending positions of the fields associated with each Detailed Table can be found using the Sequence Number and Table Number Lookup file, which is discussed in [Chapter 2.3](#). The estimates or margins of error for one Detailed Table span several fields within a row.

Here is the record layout of the estimates and the margin of error files:

Field Name	Description	Field Size
FILEID	File Identification	6 Characters
FILETYPE	File Type	6 Characters
STUSAB	State/U.S.-Abbreviation (USPS)	2 Characters
CHARITER	Character Iteration	3 Characters
SEQUENCE	Sequence Number	4 Characters
LOGRECNO	Logical Record Number	7 Characters
Field # 7 and up	Estimates	Various

Going back to the example from [Chapter 2.3](#), we know that table B08406 corresponds to sequence “0003”. Additionally, the Sequence Number and Table Number Lookup file (as shown earlier) tells us that table B08406 begins at position seven and contains 51 cells.

In order to get estimates for Maryland; Allegany County, MD; and Anne Arundel County, MD one must recall the logical record numbers associated with each geography. In [Chapter 2.4](#), we identified these to be “0000001”, “0000012”, and “0000013”, respectively. The logical record number, LOGRECNO, must be used to merge the geography information to the estimate and margin of error files.

The example below shows the estimate file for sequence “0003” and all geographies except census tracts and block groups for the state of Maryland using the 2010 ACS 1-year Summary File. Note that each row has a uniquely assigned logical record number, called LOGRECNO, which links the estimate to a specific geographic area. The pictured example has the logical record numbers corresponding to Maryland, Allegany County, and Anne Arundel County circled. Estimates for table B08406 at these geographic levels can be found within their respective rows at field seven and continuing for 50 additional fields.

2.6 How to Join the ACS Summary File to the TIGER/Line Shapefiles

TIGER/Line Shapefiles allow data users to directly link geographic areas to data from the American Community Survey and other surveys. The TIGER/Line Shapefiles are designed for use with geographic information system (GIS) software. Learn more about TIGER/Line Shapefiles at www.census.gov/geo/www/tiger/.

The variable GEOID joins the ACS Summary File to the TIGER/Line Shapefiles. For the ACS Summary File, GEOID is located in column AW of the geography file. It is not found in the estimates or margins of error files. (As discussed in previous chapters, the variable LOGRECNO is needed to join together the parts that make up the Summary File: the geography, estimates, and margins of error files). GEOID's corresponding variable in the 2010 TIGER/Line Shapefiles is GEOID10.

We will walk through an example of joining these files using Kent County, Delaware. In the ACS Summary File, the GEOID is 05000US10001. In the TIGER/Line Shapefiles, the GEOID10 is 10001. (GEOID is a concatenation of all the codes associated with a given geographic area, such as the state FIPS code, county FIPS code, etc. The exact concatenation varies by geographic area. In this example, 10=state FIPS code and 001=county FIPS code.)

The ACS Summary File GEOID contains the necessary information to connect to the TIGER/Line Shapefiles, but it needs to be modified in order to exactly match up. Notice that GEOID, **05000US10001**, contains the GEOID10 string, **10001**. In order to create an exact match of GEOID and GEOID10, it is necessary to remove all of the characters before and including the letter "S" in the ACS Summary File. By removing these characters, the new GEOID in the ACS Summary File exactly matches the field GEOID10 in the TIGER/Line Shapefiles.

The following is an example of how to modify the ACS Summary File's GEOID in Excel 2007 so it can be joined with TIGER/Line Shapefiles:

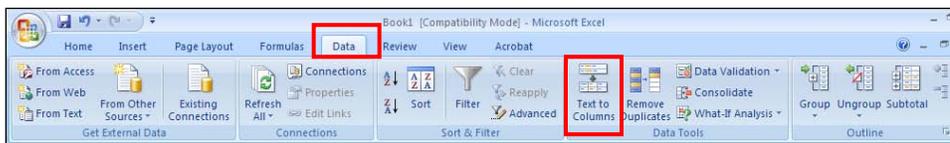

- 1) Open the ACS Summary File comma delimited geography file in Excel. This example uses Delaware's geography file (g20101de.csv) available at www2.census.gov/acs2010_3yr/summaryfile/ with the column headers from the geography file template copied into Delaware's geography file. Learn more about the geography file template in [Chapter 2.4](#).
- 2) Insert 2 blank columns to the right of the column "GEOID." Your modified GEOID will eventually go into the second column. (Note: Columns F through AV in the diagrams following are hidden for illustrative purposes.)

1	A	B	C	D	E	AW	AX	AY	AZ
FILEID	STUSAB	SUMLEVEL	COMPONENT	LOGRECNO	GEOID				NAME
2	equal to ACS Summary File identification	State Postal Abbrevia	Summary Level	Geographic Component	Logical Record Number	Geographic Identifier			Area Name
3	ACSSF	DE	40	0	1	04000US10			Delaware
4	ACSSF	DE	40	1	2	04001US10			Delaware -- Urban
5	ACSSF	DE	40	43	3	04043US10			Delaware -- Rural

13	ACSSF	DE	50	0	11	05000US10001			Kent County, Delaware
14	ACSSF	DE	50	0	12	05000US10003			New Castle County, Delaware
15	ACSSF	DE	50	0	13	05000US10005			Sussex County, Delaware
16	ACSSF	DE	160	0	14	16000US1077580			Wilmington city, Delaware
17	ACSSF	DE	312	0	15	31200US379801077580			Wilmington city, DE; Philadelphia-Camden-Wil
18	ACSSF	DE	500	0	16	50000US1000			Congressional District (at Large) (111th Congres
19	ACSSF	DE	795	0	17	79500US1000101			PUMAS 00101, Delaware
20	ACSSF	DE	795	0	18	79500US1000102			PUMAS 00102, Delaware
21	ACSSF	DE	795	0	19	79500US1000103			PUMAS 00103, Delaware
22	ACSSF	DE	795	0	20	79500US1000104			PUMAS 00104, Delaware
23	ACSSF	DE	795	0	21	79500US1000200			PUMAS 00200, Delaware

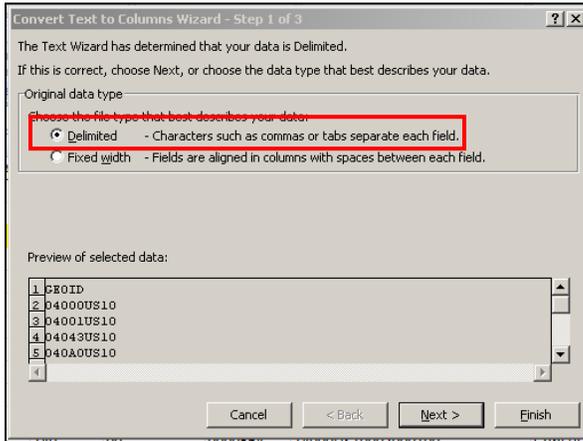

3) Next, select the column "GEOID."

1	A	B	C	D	E	AW	AX	AY	AZ
FILEID	STUSAB	SUMLEVEL	COMPONENT	LOGRECNO	GEOID				NAME
2	equal to ACS Summary File identification	State Postal Abbrevia	Summary Level	Geographic Component	Logical Record Number	Geographic Identifier			Area Name
3	ACSSF	DE	40	0	1	04000US10			Delaware
4	ACSSF	DE	40	1	2	04001US10			Delaware -- Urban
5	ACSSF	DE	40	43	3	04043US10			Delaware -- Rural
6	ACSSF	DE	40	A0	4	040A0US10			Delaware -- In metropolitan or micropolitan sta
7	ACSSF	DE	40	C0	5	040C0US10			Delaware -- In metropolitan statistical area
8	ACSSF	DE	40	C1	6	040C1US10			Delaware -- In metropolitan statistical area -- In
9	ACSSF	DE	40	C2	7	040C2US10			Delaware -- In metropolitan statistical area -- nc
10	ACSSF	DE	40	E0	8	040E0US10			Delaware -- In micropolitan statistical area
11	ACSSF	DE	40	E2	9	040E2US10			Delaware -- In micropolitan statistical area -- nc
12	ACSSF	DE	40	H0	10	040H0US10			Delaware -- Not in metropolitan statistical area
13	ACSSF	DE	50	0	11	05000US10001			Kent County, Delaware
14	ACSSF	DE	50	0	12	05000US10003			New Castle County, Delaware
15	ACSSF	DE	50	0	13	05000US10005			Sussex County, Delaware
16	ACSSF	DE	160	0	14	16000US1077580			Wilmington city, Delaware
17	ACSSF	DE	312	0	15	31200US379801077580			Wilmington city, DE; Philadelphia-Camden-Wil
18	ACSSF	DE	500	0	16	50000US1000			Congressional District (at Large) (111th Congres
19	ACSSF	DE	795	0	17	79500US1000101			PUMAS 00101, Delaware
20	ACSSF	DE	795	0	18	79500US1000102			PUMAS 00102, Delaware
21	ACSSF	DE	795	0	19	79500US1000103			PUMAS 00103, Delaware
22	ACSSF	DE	795	0	20	79500US1000104			PUMAS 00104, Delaware
23	ACSSF	DE	795	0	21	79500US1000200			PUMAS 00200, Delaware

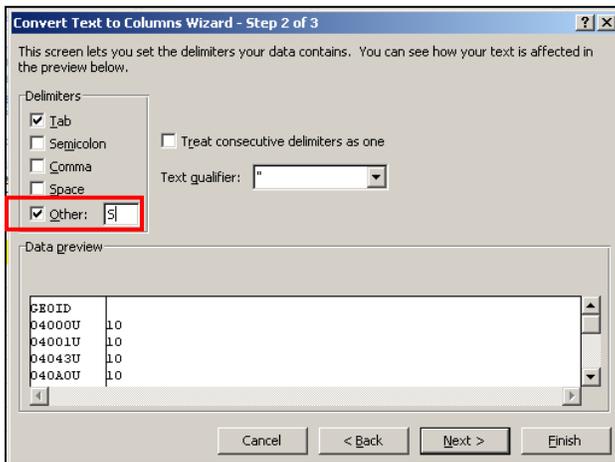

4) Select the "Data" tab from the top menu, then select "Text to Columns." The "Convert Text to Columns Wizard" box should pop up.

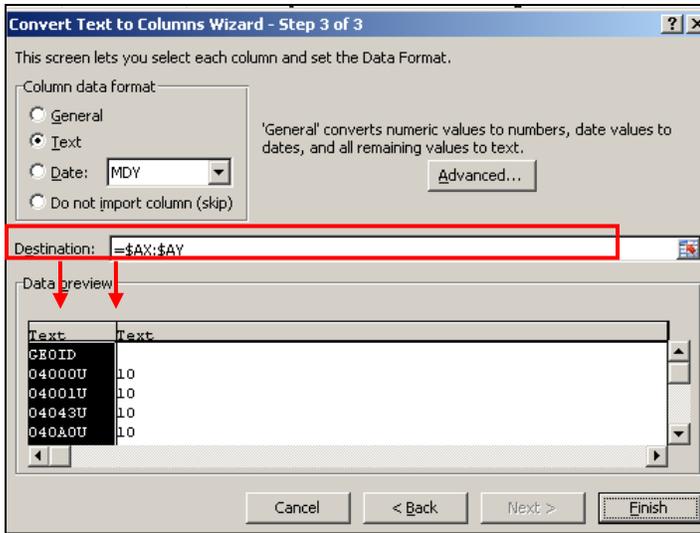

- 5) In the “Convert Text to Columns Wizard,” select “Delimited” under “Choose the file type that best describes your data:” then click “Next.”

- 6) Check “Other” as the delimiter and type the letter “S” into the box. Click “Next.”

- 7) In the “Data preview” window, click on the top of both columns in “Data preview” and select “Text” under “Column data format.” In “Destination,” select the two blank columns that you created in Step 1. Click “Finish.”

- 8) Column AY should now contain the modified GEOID that corresponds to GEOID10 in the TIGER/Line Shapefiles. The second screenshot shows the TIGER/Line Shapefile for Kent County, Delaware.

	A	B	C	D	E	AW	AX	AY	AZ
1	FILEID	STUSAB	SUMLEVEL	COMPONENT	LOGRECNO	GEOID	GEOID	NAME

- 9) The ACS Summary File and the TIGER/Line Shapefile should now be ready to be joined using GIS software. Visit “Working with TIGER/Line Shapefiles” at <http://www.census.gov/geo/www/tiger/wvtl/wvtl.html> to learn more about how to access and use the TIGER/Line Shapefiles.

3 User Tools

3.1 Summary File Excel Retrieval Tool

If only a few tables are needed, a useful tool is the Summary File Excel Retrieval Tool. If users have Excel 2007 or newer, the tool is able to get tables from an entire sequence and from a summary level and component. Information on how to use Summary File Excel Retrieval Tool is located on the ACS Summary File page, at www.census.gov/acs/www/data_documentation/summary_file.

Hardware and Software requirements for the application include:

- Microsoft Windows XP Professional Service Pack 3 or newer (a Mac version is being developed)
- Winzip version 14.5 or compatible
- 32 bit Office 2007 or newer
- DSL connection at 1.0 Mbps or greater is recommended

3.2 Summary File DataFerrett Application

Data from the summary file can be accessed using DataFerrett, a software application developed by the Census Bureau for disseminating large amounts of data. Users who have accessed the Public Use Microdata Sample (PUMS) files are likely already familiar with DataFerrett. As with the Summary File Excel Retrieval Tool, the DataFerrett approach is similar to American Factfinder. Users only need to know what detailed table they want; no reference to file organization of the ACS Summary File is required (e.g., “sequence number”). This is an ideal application if you would like to download a large number of geographic areas for a small number of tables at one time—for example, the age by sex table for all tracts in the country.

There are some limitations to the DataFerrett application. There is a maximum of 74,100 geographic areas with up to 200 table lines in the extract. There can be no more than 535 table lines in any single extract. Also, for the initial release of the application, only some of the summary levels are available. Please see the DataFerrett documentation for the specific summary levels.

For a tutorial on how to use and access this application to retrieve Summary File data, please visit dataferrett.census.gov/acs/acs2006-2010sf_readme.html. Documentation of the important features and limitations of the initial release of the 2006-2010 ACS 5-Year Summary File in DataFerrett can also be found there. For general information about the DataFerrett tool, visit dataferrett.census.gov.

3.3 Summary File SAS Tool

For users with SAS software, please visit the User Tools folder, www2.census.gov/acs2010_5yr/summaryfile/UserTools/ to download SAS programs. These programs allow users to load the Summary File data into SAS Datasets. The SAS programs serve as a reference for the users, and include variable labels, however modifications may be necessary before users can get the data. After the needed Summary File data have been downloaded, users should specify the locations in the library references and the infile statements.

- 1) SF20105YR_SAS.zip – Contains SAS programs, which can be used to convert each estimate and margin of error into SAS Datasets. The SAS datasets include table stubs. There is one individual SAS program for each sequence per state.
- 2) SF_All_Macro.sas – This is a detailed example SAS program containing SAS macros which access the ACS Summary File geography, estimate and margin of error data. It creates one table for all geographies from the ACS Summary File. Segments of the SAS codes can be used to convert geography files into SAS datasets.

3.4 Summary File Excel Import Tool

This tool is another way data users can read the Summary File into Excel, and it is designed to be compatible with any version of the software. While this example uses the 2007-2009 ACS 3-year Summary File, the file layout is similar for the 2006-2010 ACS 5-year Summary File. To begin using this tool, users must first download the Summary File data, the Excel template file, and the Excel geography file.

The 2009 3-year ACS Summary File is available at www2.census.gov/acs2009_3yr/summaryfile/. In this example, we are accessing the data by selecting “2007-2009 ACSSF By State All Tables,” then selecting “California All Geographies.zip.” Once downloaded and unzipped to a local directory, this compressed file contains individual text files and one geography file per Summary File sequence. We are using Sequence file 1, so you need to open and save the corresponding estimate and margin of error text files (e20093ca0001000.txt and m20093ca0001000.txt).

Next, you need to download the Excel template file, SummaryFileXLS.zip, from www2.census.gov/acs2009_3yr/summaryfile/UserTools/. (Note: SummaryFileXLS.zip is named SummaryFileTemplates.zip for 2010.) Once unzipped to a local directory, this compressed file contains an Excel file for each Summary File sequence. Again, we are using Sequence File 1, so you need to open Seq1.xls.

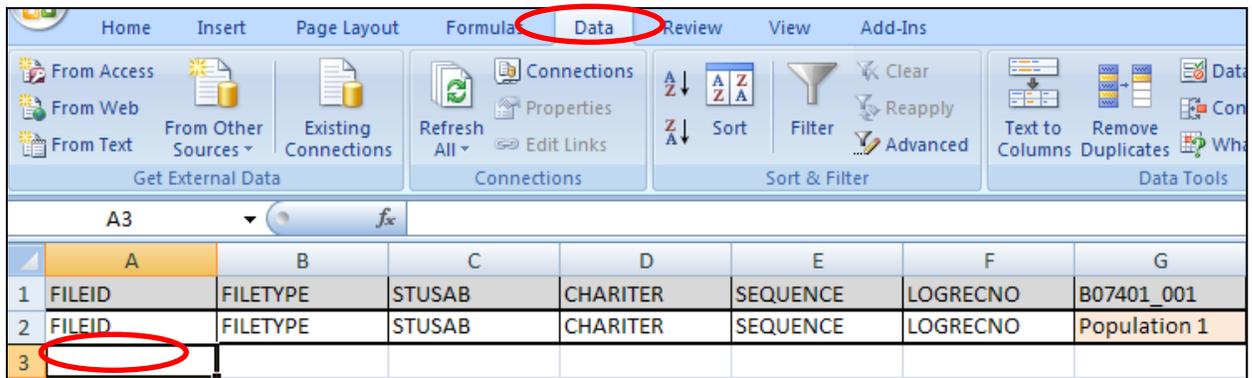

Finally, you need to download and save the Excel geography file, mini_geofile.xls, from www2.census.gov/acs2009_3yr/summaryfile/UserTools/Geography/ to the same local directory. Each worksheet in the mini_geofile.xls represents geographies that are within a state. Note that the “US” worksheet only contains summary levels that can cross state boundaries. “US” is not the data at the national summary level.

We will walk through an example using sequence 1 for the state of California:

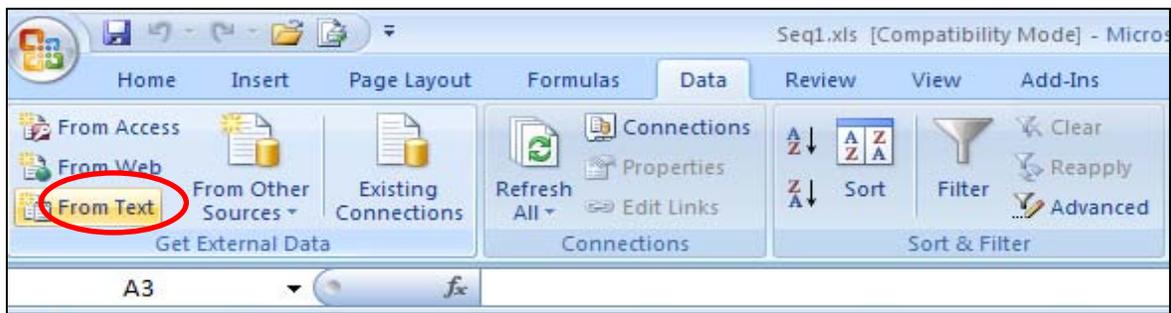

- 1) When the template file is open in Excel it should appear as below:

	A	B	C	D	E	F	G	H
1	FILEID	FILETYPE	STUSAB	CHARITER	SEQUENCE	LOGRECNO	B07401_001	B07401_002
2	FILEID	FILETYPE	STUSAB	CHARITER	SEQUENCE	LOGRECNO	Population 1	Population 1
3								
4								

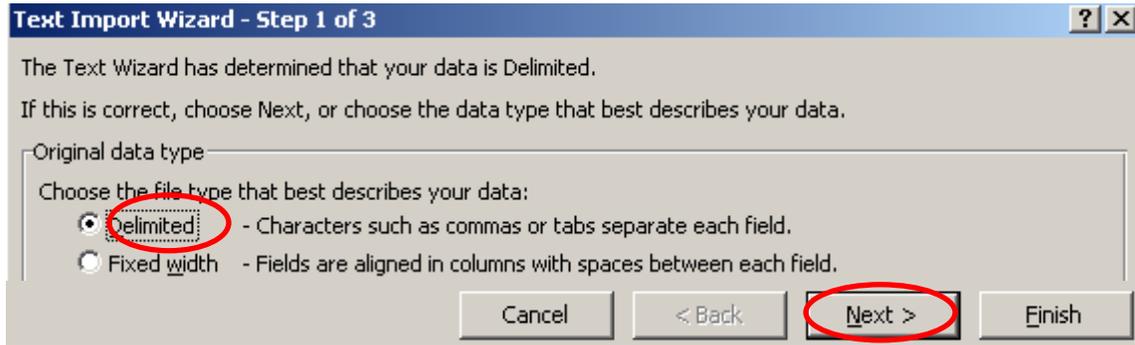

- 2) Place your cursor in cell **A3** and click on the **Data** tab in the Excel tool bar. See below:

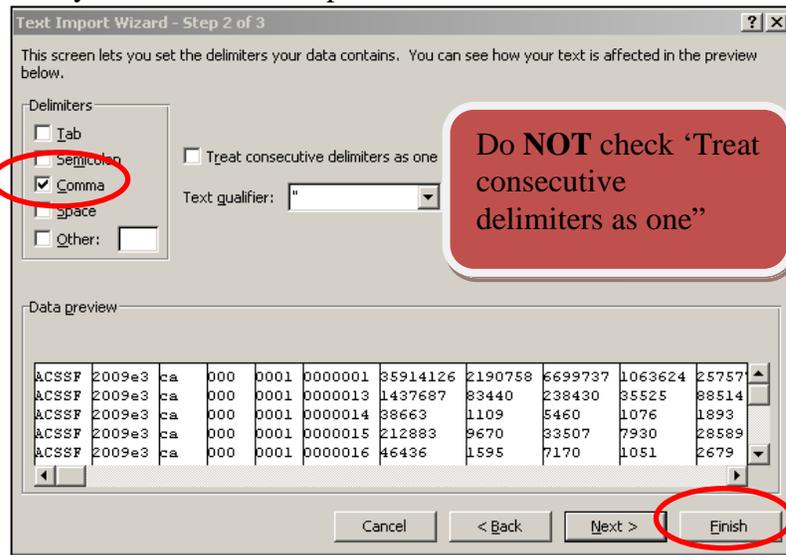

- 3) To import the Summary File text file into Excel click on **From Text** in the **Get External Data** section of the tool bar. In this example, we are opening the estimate file for California (e20093ca0001000.txt).

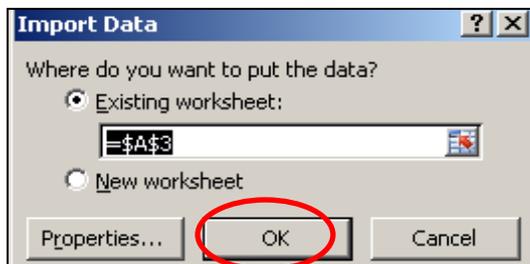

4) Step 1 of the Text Import Wizard will appear. Under **Original data type** choose **Delimited**, and then click **Next**.

5) Step 2 of the Excel Text Import Wizard will appear. Under **Delimiters** choose **Comma**. Users may click **Finish** to import the file or choose **Next** to format the Excel columns.

6) A Pop up window will appear to confirm cell **A3** as the correct cell. Click **OK**.

7) The summary file will be imported in Excel as below:

	G	H	I	J	K	L
1	B07401_001	B07401_002	B07401_003	B07401_004	B07401_005	B07401_006
2	Population 1 year and over in the United States	Population 1 year and over in the United States% 1 to 4 years	Population 1 year and over in the United States% 5 to 17 years	Population 1 year and over in the United States% 18 and 19 years	Population 1 year and over in the United States% 20 to 24 years	Population 1 year and over in the United States% 25 to 29 years
3	35914126	2190758	6699737	1063624	2575775	2730510

Row 1 – Contains a unique identifier of Table ID and Line Number with a “_” between them

Row 2 – Contains the associated metadata for each unique Identifier

Row 3 – Is the first Row of the imported data

	A	B	C	D	E	F
1	FILEID	FILETYPE	STUSAB	CHARITER	SEQUENCE	LOGRECNO
2	FILEID	FILETYPE	STUSAB	CHARITER	SEQUENCE	LOGRECNO
3	ACSSF	20093 ca		0	1	1

Column A – Is a constant value of “ACSSF” (stands for ACS Summary File)

Column B – Contains the associated metadata for each unique Identifier

Column C – Is the first Row of the imported data

8) Read in the estimates and margins of error for each sequence needed. For example, here is the screenshot of the estimates for sequence 1:

10) Add geographies by using common merged keys.

- a. To add geographies, insert two extra columns next to the padded LOGRECNO column G, and label them GEOID and Geography Name. Open the **Excel geography file** mini_geofile.xls and keep both Seq1.xls and mini_geofile.xls files open.

- 10) Repeat steps 1 through 10 to obtain the margin of errors for the same sequence for California.

4 User References

4.1 Detailed Tables

The full list of detailed tables for this release is available in [Appendix E](#).

4.2 Summary Levels/Components For Detailed Tables

The full list of summary levels and components for this release is outlined in [Appendix F](#).

4.3 Sequence Number and Table Number Lookup

It contains information on the relationship between the sequences and the tables, and indicates the relationship between the sequences and the subject areas. The Sequence Number and Table Number Lookup is available in Excel, text, and SAS dataset format, and is located here: www2.census.gov/acs2010_5yr/summaryfile/.

4.4 Table Shells List

It contains Table ID, Line Number, Unique ID (table ID + Line Number) and stub. The table shells list is located on the following site: www2.census.gov/acs2010_5yr/summaryfile/.

4.5 Excel Geography File

It contains logical record numbers (LOGRECNO), geography ID, and geographic labels by state. There are total of 53 tabs in the spreadsheet: one for each state, the District of Columbia and Puerto Rico, and one for geographies that cross state boundaries. The mini geography file list is located on the following site: www2.census.gov/acs2010_5yr/summaryfile/UserTools/Geography/.

Appendix A: Supplemental Documentation

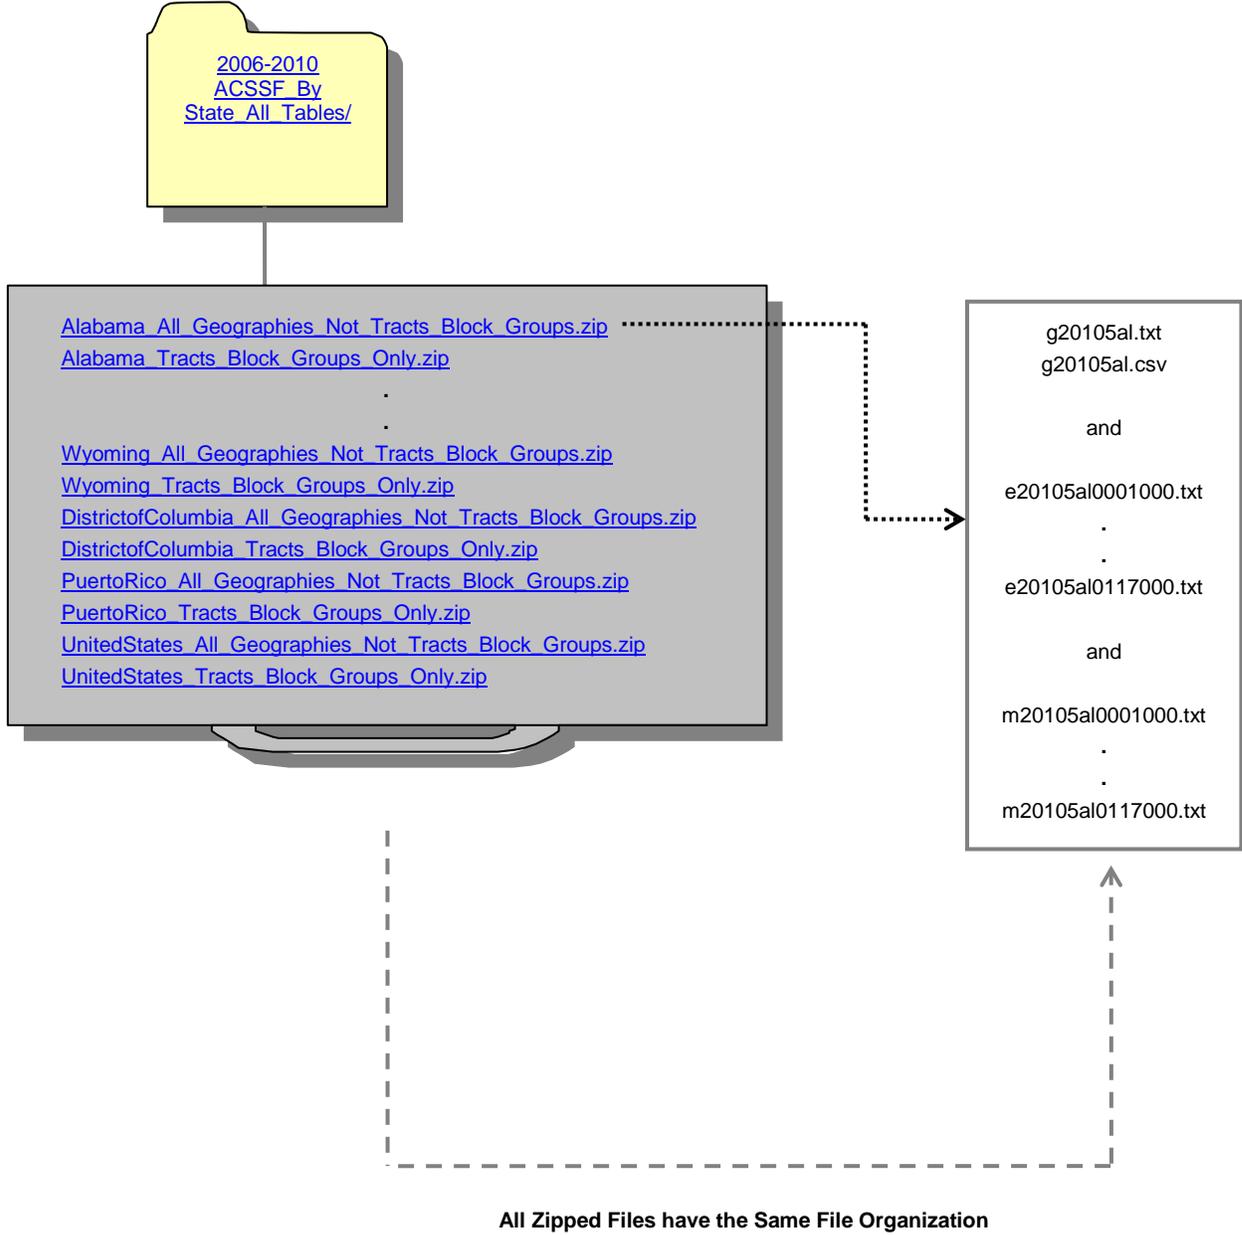

Supplemental documentation concerning the American Community Survey, to assist users using this technical document, is located on the ACS Website at: www.census.gov/acs/www/data_documentation/documentation_main/. Documents such as the Subject Definitions, Accuracy of the Data, and Code Lists are available on the URL listed above.

Appendix B: Graphical Representation of ACS Summary File Organization

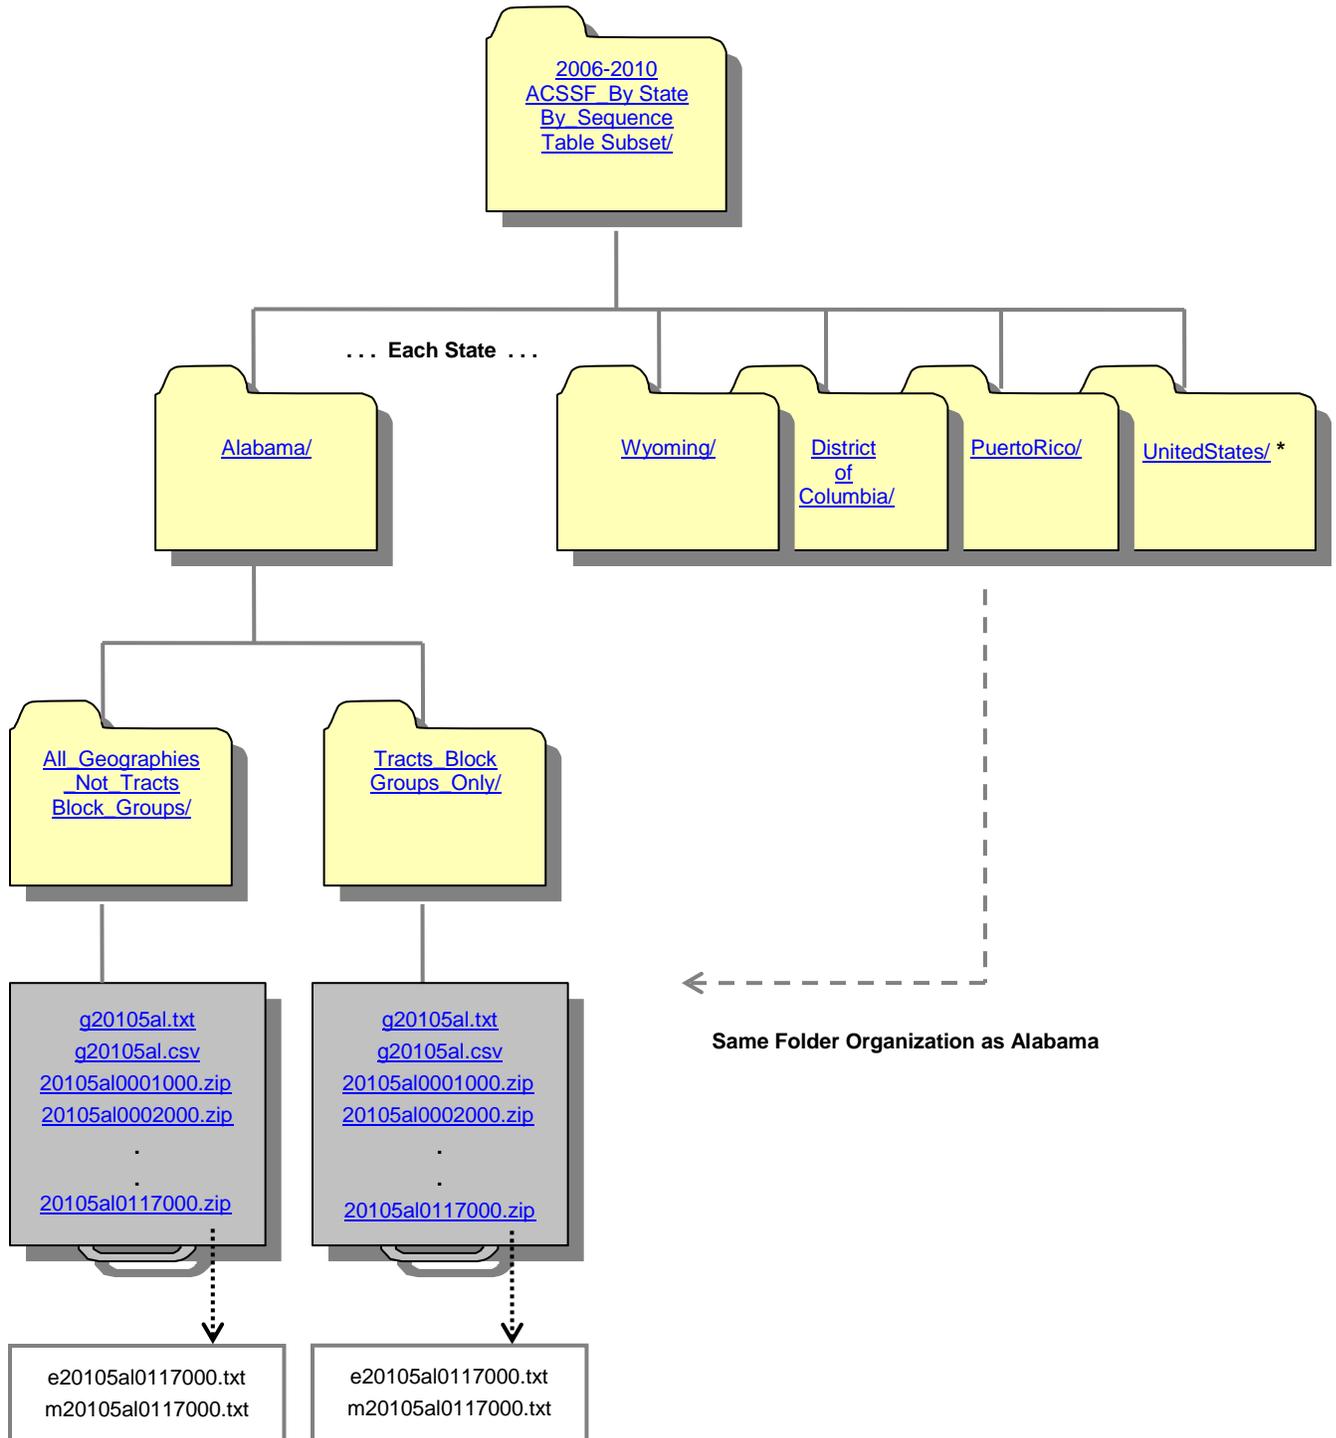

B.1 2006-2010 ACSSF All In 2 Giant Files (Experienced-Users-Only)

B.2 2006-2010 ACSSF By State All Tables

B.3 2006-2010 ACSSF By State By Sequence Table Subset

* The United States folder contains tables for summary levels that cross state boundaries, such as the nation, regions, divisions, metropolitan statistical areas and tribal reservations. It does not contain tables for geographies that are entirely within a state, such as counties and places; for those tables, go to the folder for that state.

Appendix C: User Notes

C.1 Population Thresholds

The Census Bureau publishes data for 1-year, 3-year, and 5-year estimates, with population thresholds set for the 1-year and 3-year estimates to produce reliable data. Here is a brief comparison of the three types of estimates:

1-Year Estimates	3-Year Estimates	5-Year Estimates
<ul style="list-style-type: none"> • Published for selected geographic areas with populations of 65,000 or greater • Represent the average characteristics over a calendar year • Have fewer published geographic areas than the 3-year and 5-year estimates 	<ul style="list-style-type: none"> • Published for selected geographic areas with populations of 20,000 or greater • Represent the average characteristics over the 3-year period of time • Have fewer published geographic areas than the 1-year estimates but less than the 5-year estimates 	<ul style="list-style-type: none"> • No population threshold and published for small geographic areas • Represent the average characteristics over the 5-year period of time • Have more published areas than the 1-year and 3-year estimates

For more information on the ACS estimates, users are encouraged to visit the ACS website www.census.gov/acs/www/guidance_for_data_users/estimates/.

C.2 Geography Restrictions

For data quality and geographic reasons, some tables are published with specific geography restrictions. For example, the table B05001-PR, Citizenship Status in Puerto Rico, is produced for Puerto Rico only, and the table B08501, Means Of Transportation To Work By Age For Workplace Geography, is only produced for the work place geographies. [Appendix E](#) has a complete list of tables and their geography restrictions, and [Appendix F](#) has a complete list of the published summary levels and components for this release. Other examples include the quality measures tables (the B98 series) and detailed occupation tables.

C.3 Jam Values

Some data values represent unique situations where either the information to be conveyed is an explanation for the absence of data, represented by a symbol in the data display, such as "(X)", or the information to be conveyed is an open-ended distribution, such as 115 or greater, represented by 115+.

The following special data values can appear in the ACS Summary File table as an explanation for the absence of data:

- Missing Value = “”

A missing string indicates that the estimate is unavailable. (This appears in the estimates and margins or error files as two commas adjacent to each other without anything between them, or if the last cell in a data file is filtered then you get a comma followed immediately by a carriage return or EOF.) A missing value indicates when an estimate is missing because of filtering for geographic restrictions, coefficients of variations (CV), or was removed due to the Disclosure Review Board’s (DRB) requirements. For more detail on filtering, please see [Appendix C.5](#).

- Dot = “.”

A dot indicates when the estimate has no sample observations or too few sample observations. In the margin of error files, this value could also indicate that the margin of error is unavailable for a median estimate that has been replaced with a jam value.

- Zero = “0”

A “0” entry in the margin of error column indicates that the estimate is controlled. A statistical test for sampling variability is not appropriate. This is similar to the “*****” symbol used in American FactFinder.

- Negative 1 = “-1”

This indicates that an estimate does not contain a Margin of Error. Tables B00001, B00002, and tables starting with B98 and B99 do not have margin of error (MOE) associated with them. The MOE calculations are set to -1 for these tables.

- Jam Values for Medians

The following is a listing of the “jam values” for medians. Jam values are numeric placeholders that represent open intervals above or below a number. For example, the jam value of "2499" for table B10010 does not indicate a dollar amount, but rather it means that the median is below \$2,500 and is not available.

Jam Value	Actual Meaning	Use for Medians
0	1 or less	Age, Duration of Marriage
9	9.0 or more	Rooms
10	10.0 or less	Gross Rent as Percentage of Income, Owner Costs as Percentage of Income
50	50.0 or more	Gross Rent as Percentage of Income, Owner Costs as Percentage of Income
99	100 or less	Rent, Gross Rent, Selected Monthly Owner Costs, Monthly Housing Costs
101	101 or more	Duration of Marriage
116	115 or more	Age
199	200 or less	Tax
1001	1,000 or more	Selected Monthly Owner Costs
1939	1939 or earlier	Year Built
1969	1969 or earlier	Year Moved In
2001	2,000 or more	Rent, Gross Rent
2005	2005 or later	Year Built, Year Moved In
2499	2,500 or less	Income, Earnings
4001	4,000 or more	Selected Monthly Owner Costs, Monthly Housing Costs
9999	10,000 or less	Value
10001	10,000 or more	Tax
200001	200,000 or more	Income
250001	250,000 or more	Income, Earnings
1000001	1,000,000 or more	Value

C.4 Rounding Rules and Margins of Error

B00001, B00002, B98001, and B98002 are sample counts, not estimates, and do not have margin of error (MOE) associated with them. Tables in series B99* imputation tables and B98* (except B98001 and B98002) quality measure tables do not provide margin of error calculations. The margin of error calculations are set to -1 for these tables.

There are a few special rules on how certain margin of error are determined for ACS estimates. The accuracy of the estimate (decimal place) within the detailed tables determines how many digits the margin of error is rounded.

The only exceptions to these rules are tables B19082 (Shares of aggregate household income by quintile) and B19083 (index of income inequality, commonly known as GINI). B19082 has estimates rounded to one decimal place and MOE rounded to two decimal places. B19083 has estimates rounded to three decimal places and MOE rounded to four decimal places.

C.5 Data Release Filtering Rules

Filtering rules, based on statistical reliability of the survey estimates, are used because certain geographic areas contain detailed tables include estimates whose level of reliability is unacceptable. The data release rules for the American Community Survey data tables include the following.

Every base table consists of a series of estimates. If more than half the estimates are not statistically different from 0 (at a 90 percent confidence level), then the table fails. Each estimate is subject to sampling variability that is summarized by its standard error. Dividing the standard error by the estimate yields the coefficient of variation (CV) for each of the estimates. (If the estimate is 0, a CV of 100 percent is assigned.) To implement this requirement for each table at a given geographic area, CVs are calculated for each of the table's estimates, and the median CV value is determined. If the median CV value for the table is less than or equal to 61 percent, the table passes for that geographic area; if it is greater than 61 percent, the table fails. Tables that are too sparse will fail this test. In that case, the table will not be published for that geographic area. Whenever a table fails, a simpler table that collapses some of the detailed lines together can be substituted for the original, more detailed table. The rules are then applied to the simpler table. If it passes, the simpler table is released. If it fails, none of the estimates for that particular table is released for this geographic area. These rules are applied to single-year period estimates and multi-year period estimates based on three years of sample data.

C.6 Display of Estimates

The estimates in the summary files are stored using standard notation instead of in scientific notation. The estimates are stored as whole numbers. The largest estimate in a Summary File contains 14 digits.

C.7 Sequences Used Only for United States Tables or Only for Puerto Rico Tables

There are several tables that differ between the United States (the 50 states and the District of Columbia) and Puerto Rico. The tables are different because the comparable tables may they contain different metadata (such as C06001 having 45 cells and C06001PR having 37 cells). To identify what tables are available for Puerto Rico only look for the "PR" suffix in the table id (e.g. C06001PR). Because of that, there are sequence files that apply only to the 50 states and the District of Columbia or only to Puerto Rico:

US/State-only Sequences – Missing PR Data	PR Only Sequences – Missing US/State Data
1 (US)	109 (PR)
2 (US)	110 (PR)
17 (US)	111 (PR)
18 (US)	112 (PR)
20 (US)	113 (PR)
21 (US)	114 (PR)
22 (US)	115 (PR)
23 (US)	116 (PR)
24 (US)	117 (PR)
107 (US)	118 (PR)

Therefore, for sequences 109-118 for areas other than Puerto Rico, the sequence files exist, but they are blank.

C.8 Multiple Sequences For a Table

There are six tables with more than the maximum 245 cells that cannot fit into a single sequence, so each of these tables is broken into multiple sequence files. The table below shows the tables that contain multiple sequences:

Tables That Are Contained in More Than One Sequence File

Table ID	Table Title	Sequences
B24121	Detailed Occupation By Median Earnings In The Past 12 Months For The Full-Time, Year-Round Civilian Employed Population 16 Years And Over	77, 78, 79
B24122	Detailed Occupation By Median Earnings In The Past 12 Months For The Full-Time, Year-Round Civilian Employed Male Population 16 Years And Over	80, 81, 82
B24123	Detailed Occupation For The Full-Time, Year Round Civilian Employed Population 16 Years And Over	83, 84, 85
B24124	Detailed Occupation For The Full-Time, Year Round Civilian Employed Male Population 16 Years And Over	86, 87, 88
B24125	Detailed Occupation For The Full-Time, Year Round Civilian Employed Male Population 16 Years And Over	89, 90, 91
B24126	Detailed Occupation For The Full-Time, Year Round Civilian Employed Female Population 16 Years And Over	92, 93, 94

The tables on the list are only produced at the United States national level (summary level 010), and the files for these sequences will be blank for all other summary levels.

Appendix D: Examples

D.1 Creating a Table

The following 2005-2009 ACS 5-year Summary File example is also applicable to this 5-year Summary File. Let's say that you want to create Table B08406, "Sex of Workers by Means of Transportation to Work for Workplace Geography," for the state of Alaska. Which files do you need? How do you read the files?

You will need three files:

- 1) The `Sequence_Number_and_Table_Number_Lookup.xls` spreadsheet
- 2) The zipped file `20095ak0003000.zip` and the data file `e20095ak0003000.txt`
- 3) The geography file (`g20095ak.txt`)

Start with the `Sequence_Number_and_Table_Number_Lookup.xls` spreadsheet. Under the "Tblid" column, look for the value "B08406". You will see that the "Sequence Number" is "0003." This means that the estimates you are looking for are in the data file "e20095ak0003000.txt". How do you know this is the right file? You know this from the name of the file: the "e" stands for estimate, "2009" is the year, "5" means that these are 5-year estimates, "ak" is the state (Alaska), and "0003" is the sequence number (which contains the data for Table B08406). Likewise, you need the "m20095ak0003000.txt" file for the margins of error. These two files will be found in a zipped file specifying that it is all geographies that are "not track (or) block groups". That is because we want the estimates and margins of error for the state level, Alaska. See [Chapter 2.5](#) for more information.

When you open the estimate file, `e20095ak0003000.txt`, you will see the following comma-delimited fields on the first line:

```
ACSSF,2009e5,ak,000,0003,0000001,333471,266201,220762,45439,36132,5602,3705,...
```

The first six fields – from "ACSSF" to "0000001" – are identifiers:

- 1) The first field tells you that this is an ACS Summary File;
- 2) The second tells you that these data are five-year estimates for the year 2005-2009 (notice the "e" before "2009" and the "5" at the end);
- 3) The third tells you the state, ie. "ak" is Alaska;
- 4) The fourth is an iteration number;
- 5) The fifth is the sequence number,
- 6) The last is a logical record code, LOGRECNO. The LOGRECNO identifies the geographic area within a state.

These identifiers begin each new line in the estimate file, and the same holds true for the margin of error files. You can compare these identifiers with those in the respective margin of error file, `m20095ak0003000.txt`.

Then use the geography file for Alaska to determine the location within the state to which the data refer. The appropriate file is g20095ak.txt, where “g” stands for geography, “2009” is the year, “5” is the period estimate (in this case, 5-year estimate), and “ak” is the state. The geography file, g20095ak.txt, defines the LOGRECNO. Each LOGRECNO in this file specifies a geographic area pertaining to the state. For example, a LOGRECNO of “0000001” means the state of Alaska; a LOGRECNO of “0000002” means just the urban areas in Alaska; a LOGRECNO of “0000003” refers to just rural areas in Alaska. (Each state geography file also contains the lower-case FIPS State Code.) Please be aware that each state has its own geography file. For more information, see [Chapter 2.4](#).

Glancing back at the Sequence Number and Table Number Lookup file, you will see that Table 08406 in sequence “0003” begins at the seventh position. From this point forward, for 51 fields (indicated on the same file), each field corresponds to the value of a “line number” in the table. So, field number seven, the 333471 value, corresponds to line number one, which is “Total”. Field number eight, the 266201 value, refers to line number two, which is “Car, Truck, or Van.” Field number nine, the 220762 value, corresponds to line number three, which is “Drove alone.” This continues all the way up to line number 51, at which point Table B08406 ends.

Were you to read all these files into a computer program using software such as SAS, you could translate the first nine fields of e20095ak0003000.txt as follows:

TABLE B08406: SEX OF WORKERS BY MEANS OF TRANSPORTATION TO WORK FOR WORKPLACE GEOGRAPHY

FILEID	FILE TYPE	STUSAB	CHARITER	SEQUENCE	LOGRECNO	Total	Car, Truck, or Van	Drove Alone
ACSSF	2009e5	ak	000	0003	0000001	333471	266201	220762
ACSSF	2009e5	ak	000	0003	0000013	2440	340	252
ACSSF	2009e5	ak	000	0003	0000014	5266	1046	620
ACSSF	2009e5	ak	000	0003	0000015	151263	135626	114936
ACSSF	2009e5	ak	000	0003	0000016	6421	2455	1586

Merging the geography file, the table shell, and the estimate and margin of error files together creates an excerpt of Table B08406, shown below:

Table ID	Line Number	Sequence Number	Table Title	Estimates	Margin of Error
B08406		003	SEX OF WORKERS BY MEANS OF TRANSPORTATION TO WORK FOR WORKPLACE GEOGRAPHY		
B08406		003	Universe: Workers 16 years and over		
B08406	1	003	Total:	333,471	+/-2,630
B08406	2	003	Car, truck, or van:	266,201	+/-2,589
B08406	3	003	Drove alone	220,762	+/-2,439
B08406	4	003	Carpooled:	45,439	+/-1,795
B08406	5	003	In 2-person carpool	36,132	+/-1,596

D.2 Creating a Table Using SAS

Here is an example of how to access the Summary Files for one table for all geographies from the ACS Summary File. The following 2005-2009 ACS 5-year Summary File example is also applicable to this 5-year Summary File.

Question: I am interested in downloading table B01001 for all published ACS geographies, how would I do this?

- 1) Go to the Sequence Number and Detailed Table Number Lookup File ([Chapter 2.3](#)) to locate sequence number for table B01001. There are Excel and SAS dataset versions of the file. They are available at www2.census.gov/acs2009_5yr/summaryfile
- 2) Use the Summary File SAS Example Macros located at www2.census.gov/acs2009_5yr/summaryfile/UserTools/. Run the macro:

```
%TableShell(B01001);
```

This macro will provide metadata information on a given table, in this case B01001.

- 3) The following SAS dataset will be created with information about table B01001:

Table ID	Sequence Number	Line Number	Start Position	Total Cells in Table	Total Cells in Sequence	Table Title
B01001	0013		7	49 CELLS		SEX BY AGE
B01001	0013					Universe: Total population
B01001	0013	1				Total:
B01001	0013	2				Male:
B01001	0013	3				Under 5 years
B01001	0013	47				75 to 79 years
B01001	0013	48				80 to 84 years
B01001	0013	49				85 years and over

We can see that table B01001 is located in Sequence 0013; this applies to all published geographies.

- 4) We can read into SAS all tables in the 0013 sequence by running the SAS Example Macros:

```
%CallSt;
```

This macro will run a do loop creating State two-digit abbreviations, which will allow a simple way to read the Summary Files into SAS for all geographies. Each time a valid two digit state abbreviation is created, the macro %ALLSeqs is run with the two digit state abbreviation.

The **%ALLSeqs** Macro performs the following tasks:

- A. Read the geographic header file - **%AnyGeo** Macro.
- B. There is a do loop to allow you to choose which sequences you would like to read in for example if you wanted sequence 0010 set the loop to be `do x=13 %to 13;` - The 0 values will be filled in.
- C. Within the do loop the following macros will be executed:
 - a. **%TablesBySeq;** -- This will give information about the whole 0003 sequence, not just table B01001.
 - b. **%ReadDataFile** - This macro is called two times once for each type of estimate. This macro will generate and run SAS code for each sequence specified in the do loop in step 2 and for each geography specified in the **%callst** macro.
 - c. Lastly, there is a merge statement that will merge together each of the three types of estimates and the geography header file by sequence number per geography.

5) You now will have all tables in the 0013 sequence read into SAS in the following dataset names, if the code is not modified, in the work directory Sf0013<st two-digit abbrev>.sas7bdat.

Appendix E: Detailed Tables for the 2006-2010 ACS 5-Year Estimates

Table Number	Table Title	Table Restrictions for All Geographies Except Block Groups	Table Available for Block Groups on Summary File?	Summary File Sequence Number	Summary File Starting and Ending Positions
B00001	Unweighted Sample Count Of Population	See Note 1	Yes	9	7-7
B00002	Unweighted Sample Housing Units	See Note 1	Yes	9	8-8
B01001	Sex By Age		Yes	10	7-55

Note 1: Area must contain at least 3 occupied households. Data for areas containing fewer than 3 occupied households is not published.

Note 2: Tables are only published for States, Counties, Places, Minor Civil Divisions, Combined Statistical Areas, Metropolitan Statistical Areas/Micropolitan Statistical Areas, Principal Cities, Metropolitan Divisions, Combined New England City and Town Areas, New England City and Town Areas (NECTA), NECTA Divisions, and County Subdivisions-Place/Remainders. Geography based on residence one year ago. Areas with fewer than 50 ACS respondents are not identified.

Note 3: Tables are only published for States, Counties, Minor Civil Divisions, Combined Statistical Areas, Metropolitan Statistical Areas/Micropolitan Statistical Areas, Metropolitan Divisions, Combined New England City and Town Areas, New England City and Town Areas (NECTA), and NECTA Divisions. Geography based on place of work. Areas with fewer than 50 ACS respondents are not identified.

Appendix F: Summary Levels/Components for the 2006-2010 ACS 5-Year Detailed Tables

Summary Level	Component	Name	In the US File or the Individual State Files	File or Folder (All_Geographies_ Not_Tracts_Block_Groups or Tracts_Block_Groups_Only)
010	00	United States	US	All Geos Xcpt T&BG
010	01	United States; Urban	US	All Geos Xcpt T&BG
010	43	United States; Rural	US	All Geos Xcpt T&BG
010	89	United States; American Indian Reservation and Trust Land-Federal	US	All Geos Xcpt T&BG
010	90	United States; American Indian Reservation and Trust Land-State	US	All Geos Xcpt T&BG
010	91	United States; Oklahoma Tribal Statistical Area	US	All Geos Xcpt T&BG
010	92	United States; Tribal Designated Statistical Area	US	All Geos Xcpt T&BG
010	93	United States; Alaska Native Village Statistical Area	US	All Geos Xcpt T&BG
010	94	United States; State Designated Tribal Statistical Area (Formerly SDAISA)	US	All Geos Xcpt T&BG
010	95	United States; Hawaiian Home Land	US	All Geos Xcpt T&BG
010	A0	United States; In Metropolitan or Micropolitan Statistical Area	US	All Geos Xcpt T&BG
010	C0	United States; In Metropolitan Statistical Area	US	All Geos Xcpt T&BG
010	C1	United States; In Metropolitan Statistical Area-In Principal City	US	All Geos Xcpt T&BG
010	C2	United States; In Metropolitan Statistical Area-Not In Principal City	US	All Geos Xcpt T&BG
010	E0	United States; In Micropolitan Statistical Area	US	All Geos Xcpt T&BG
010	E1	United States; In Micropolitan Statistical Area-In Principal City	US	All Geos Xcpt T&BG
010	E2	United States; In Micropolitan Statistical Area-Not In Principal City	US	All Geos Xcpt T&BG
010	G0	United States; Not In Metropolitan or Micropolitan Statistical Area	US	All Geos Xcpt T&BG
010	H0	United States; Not In Metropolitan Statistical Area	US	All Geos Xcpt T&BG
020	00	Region	US	All Geos Xcpt T&BG
020	01	Region; Urban	US	All Geos Xcpt T&BG
020	43	Region; Rural	US	All Geos Xcpt T&BG
020	A0	Region; In Metropolitan or Micropolitan Statistical Area	US	All Geos Xcpt T&BG
020	C0	Region; In Metropolitan Statistical Area	US	All Geos Xcpt T&BG
020	C1	Region; In Metropolitan Statistical Area-In Principal City	US	All Geos Xcpt T&BG
020	C2	Region; In Metropolitan Statistical Area-Not In Principal City	US	All Geos Xcpt T&BG
020	E0	Region; In Micropolitan Statistical Area	US	All Geos Xcpt T&BG
020	E1	Region; In Micropolitan Statistical Area-In Principal City	US	All Geos Xcpt T&BG
020	E2	Region; In Micropolitan Statistical Area-Not In Principal City	US	All Geos Xcpt T&BG
020	G0	Region; Not In Metropolitan or Micropolitan Statistical Area	US	All Geos Xcpt T&BG
020	H0	Region; Not In Metropolitan Statistical Area	US	All Geos Xcpt T&BG
030	00	Division	US	All Geos Xcpt T&BG
030	01	Division; Urban	US	All Geos Xcpt T&BG
030	43	Division; Rural	US	All Geos Xcpt T&BG
030	A0	Division; In Metropolitan or Micropolitan Statistical Area	US	All Geos Xcpt T&BG
030	C0	Division; In Metropolitan Statistical Area	US	All Geos Xcpt T&BG
030	C1	Division; In Metropolitan Statistical Area-In Principal City	US	All Geos Xcpt T&BG
030	C2	Division; In Metropolitan Statistical Area-Not In Principal City	US	All Geos Xcpt T&BG
030	E0	Division; In Micropolitan Statistical Area	US	All Geos Xcpt T&BG
030	E1	Division; In Micropolitan Statistical Area-In Principal City	US	All Geos Xcpt T&BG

2006-2010 ACS 5-Year Summary File Technical Documentation

Summary Level	Component	Name	In the US File or the Individual State Files	File or Folder (All_Geographies_ Not_Tracts_Block_Groups or Tracts_Block_Groups_Only)
030	E2	Division; In Micropolitan Statistical Area-Not In Principal City	US	All Geos Xcpt T&BG
030	G0	Division; Not In Metropolitan or Micropolitan Statistical Area	US	All Geos Xcpt T&BG
030	H0	Division; Not In Metropolitan Statistical Area	US	All Geos Xcpt T&BG
040	00	State	State	All Geos Xcpt T&BG
040	01	State; Urban	State	All Geos Xcpt T&BG
040	43	State; Rural	State	All Geos Xcpt T&BG
040	A0	State; In Metropolitan or Micropolitan Statistical Area	State	All Geos Xcpt T&BG
040	C0	State; In Metropolitan Statistical Area	State	All Geos Xcpt T&BG
040	C1	State; In Metropolitan Statistical Area-In Principal City	State	All Geos Xcpt T&BG
040	C2	State; In Metropolitan Statistical Area-Not In Principal City	State	All Geos Xcpt T&BG
040	E0	State; In Micropolitan Statistical Area	State	All Geos Xcpt T&BG
040	E1	State; In Micropolitan Statistical Area-In Principal City	State	All Geos Xcpt T&BG
040	E2	State; In Micropolitan Statistical Area-Not In Principal City	State	All Geos Xcpt T&BG
040	G0	State; Not In Metropolitan or Micropolitan Statistical Area	State	All Geos Xcpt T&BG
040	H0	State; Not In Metropolitan Statistical Area	State	All Geos Xcpt T&BG
050	00	State-County	State	All Geos Xcpt T&BG
060	00	State-County-County Subdivision	State	All Geos Xcpt T&BG
067	00	State-County-County Subdivision-Subminor Civil Division	State	All Geos Xcpt T&BG
070	00	State-County-County Subdivision-Place/Remainder	State	All Geos Xcpt T&BG
080	00	State-County-County Subdivision-Place/Remainder-Census Tract	State	All Geos Xcpt T&BG
140	00	State-County-Census Tract	State	Tracts & BGs Only
150	00	State-County-Census Tract-Block Group	State	Tracts & BGs Only
155	00	State-Place-County	State	All Geos Xcpt T&BG
160	00	State-Place	State	All Geos Xcpt T&BG
170	00	State-Consolidated City	State	All Geos Xcpt T&BG
172	00	State-Consolidated City-Place Within Consolidated City	State	All Geos Xcpt T&BG
230	00	State-Alaska Native Regional Corporation	State	All Geos Xcpt T&BG
250	00	American Indian Area/Alaska Native Area/Hawaiian Home Land	US	All Geos Xcpt T&BG
251	00	American Indian Area-Tribal Subdivision/Remainder	US	All Geos Xcpt T&BG
252	00	American Indian Area/Alaska Native Area (Reservation or Statistical Entity Only)	US	All Geos Xcpt T&BG
254	00	American Indian Area (Off-Reservation Trust Land Only)/Hawaiian Home Land	US	All Geos Xcpt T&BG
256 (New)	00	American Indian Area-Tribal Census Tract	US	All Geos Xcpt T&BG
258 (New)	00	American Indian Area-Tribal Census Tract-Tribal Block Group	US	All Geos Xcpt T&BG
260	00	American Indian Area/Alaska Native Area/Hawaiian Home Land-State	State	All Geos Xcpt T&BG
269	00	American Indian Area/Alaska Native Area/Hawaiian Home Land-State-Place/Remainder	State	All Geos Xcpt T&BG
270	00	American Indian Area/Alaska Native Area/Hawaiian Home Land-State-County	State	All Geos Xcpt T&BG
280	00	State-American Indian Area/Alaska Native Area/Hawaiian Home Land	State	All Geos Xcpt T&BG
283	00	State-American Indian Area/Alaska Native Area (Reservation or Statistical Entity Only)	State	All Geos Xcpt T&BG
286	00	State-American Indian Area (Off-Reservation Trust Land Only)/Hawaiian Home Land	State	All Geos Xcpt T&BG
290	00	American Indian Area-Tribal Subdivision/Remainder-State	State	All Geos Xcpt T&BG
291 (New)	00	American Indian Area (Reservation Only)-Tribal Census Tract	US	All Geos Xcpt T&BG
292 (New)	00	American Indian Area (Off-Reservation Trust Land Only)-Tribal Census Tract	US	All Geos Xcpt T&BG

2006-2010 ACS 5-Year Summary File Technical Documentation

Summary Level	Component	Name	In the US File or the Individual State Files	File or Folder (All_Geographies_ Not_Tracts_Block_Groups or Tracts_Block_Groups_Only)
293 (New)	00	American Indian Area (Reservation Only)-Tribal Census Tract-Tribal Block Group	US	All Geos Xcpt T&BG
294 (New)	00	American Indian Area (Off-Reservation Trust Land Only)-Tribal Census Tract-Tribal Block Group	US	All Geos Xcpt T&BG
310	00	Metropolitan Statistical Area/Micropolitan Statistical Area	US	All Geos Xcpt T&BG
311	00	Metropolitan Statistical Area/Micropolitan Statistical Area-State	State	All Geos Xcpt T&BG
312	00	Metropolitan Statistical Area/Micropolitan Statistical Area-State-Principal City	State	All Geos Xcpt T&BG
