1/ The estimates of earnings for 1998-2006 are based on the 2002 North American Industry Classification System (NAICS). The estimates for 2007-2010 are based on the 2007 NAICS. The estimates for 2011 forward are based on the 2012 NAICS.

2/ Midquarter population estimates by state are derived by BEA based on unpublished Census Bureau estimates of beginning-of-month population.

3/ Per capita personal income is total personal income divided by total quarterly population estimates.

4/ Employer contributions for government social insurance are included in earnings by industry and earnings by place of work, but they are excluded from net earnings by place of residence and personal income. Employee and self-employed contributions are subtractions in the calculation of net earnings by place of residence and all of the income measures.

5/ The adjustment for residence is the net inflow of the earnings of interarea commuters. For the United States, it consists of adjustments for border workers and US residents employed by international organizations and foreign embassies.

6/ Rental income of persons includes the capital consumption adjustment.

7/ Includes actual employer contributions and actuarially imputed employer contributions to reflect benefits accrued by defined benefit pension plan participants through service to employers in the current period.

8/ Proprietors' income includes the inventory valuation adjustment and the capital consumption adjustment.

(NA) Data not available for this quarter.

Data extracts prepared by the Maryland Department of Planning, Planning Data Services, March 2016, from BEA Table SQ5.
