

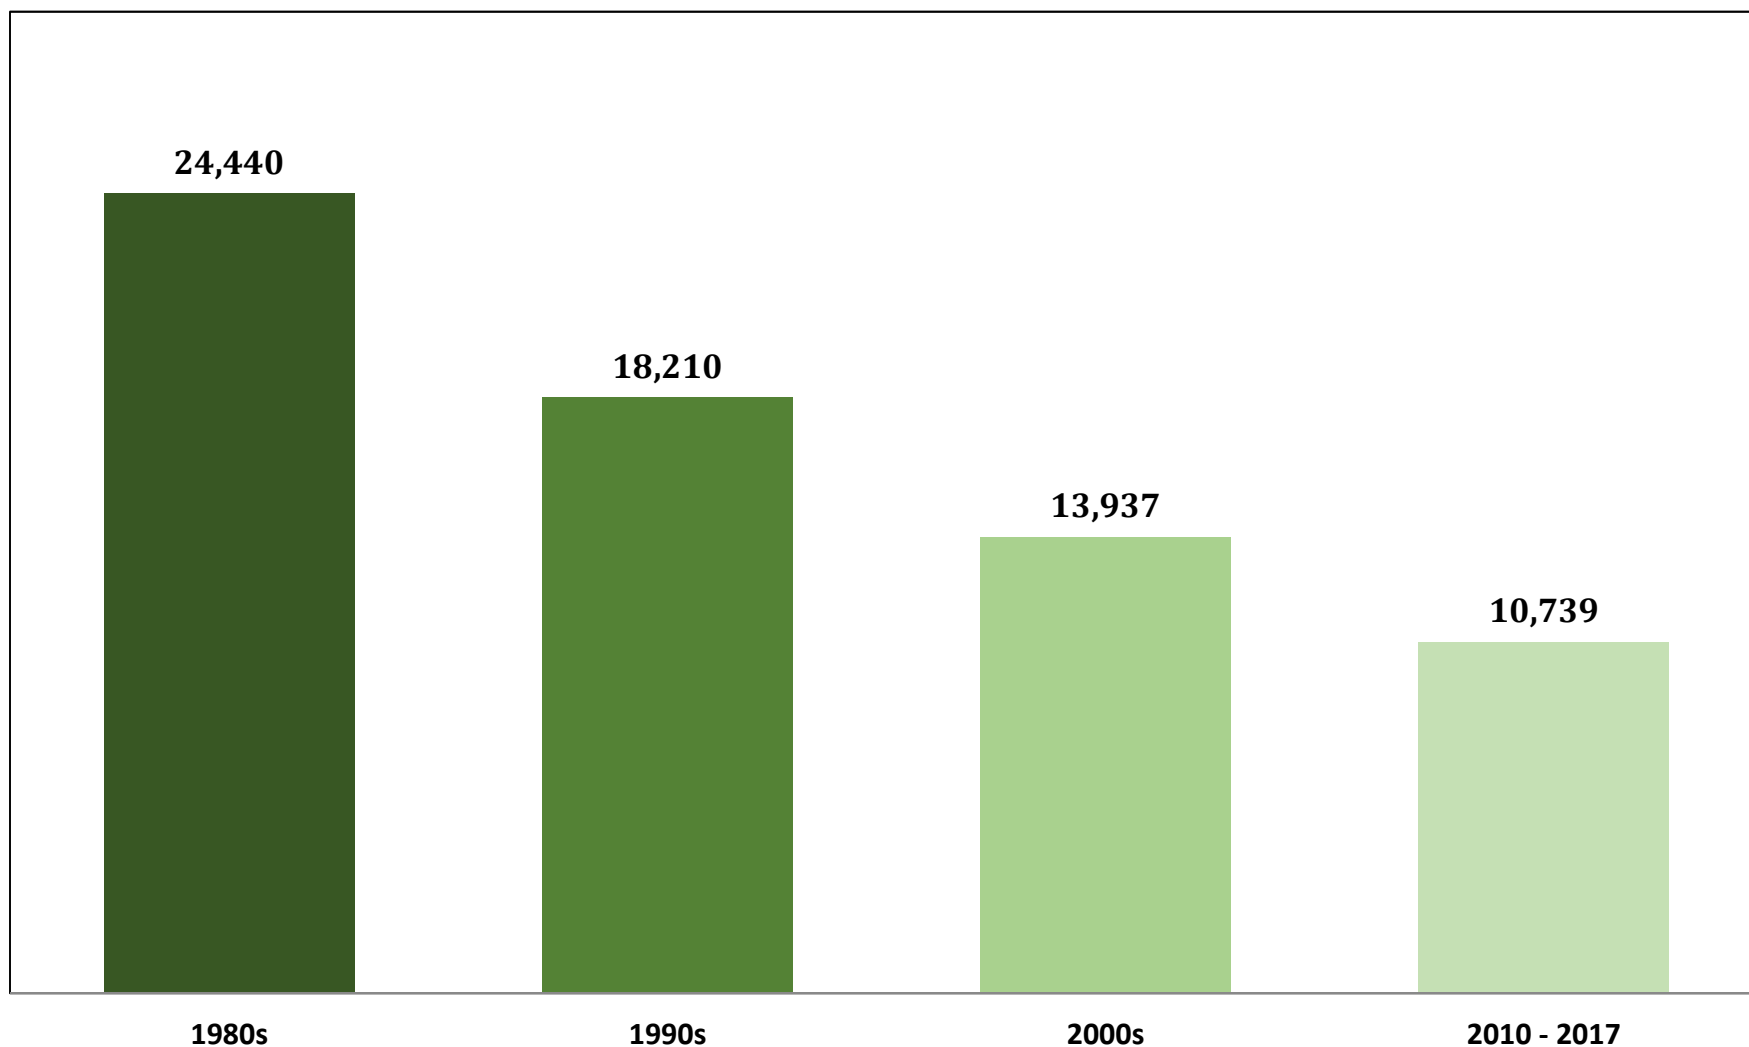

**Chart 11. Annualized Total Net Migration for Maryland**

Source: Maryland Department of Planning. Total migration is calculated as a residual for the 1980s through the 2000s using the decennial census (1980s and 1990s) and the 2010 American Community Survey (2000s) as well as birth and death data from administrative records. Total migration for 2010 to 2016 is from the U.S. Census Bureau's components of population change, part of their annual population estimates for April 1, 2010 to July 1, 2016 period.
