## Property Maps offered through Open Data Initiative

Digital property maps and parcel information now free to the public

Download statewide Sales datasets if your data were downloaded on or before:

July 28, 2015

**[February 2015 Sales](#)**

**[April 2015 Sales](#)**

**[March 2015 Sales](#)**

**[May 2015 Sales](#)**

There was an issue with the building type and building style code data (STRUBLDG and STRUSTYL fields) in the source statewide Sales download data received from the State Department of Assessments and Taxation (SDAT) on and after February 10, 2015. This issue caused the associated code description data (DESCBLDG and DESCSTYL fields) to fail to load correctly. The issue has now

been resolved. Statewide Sales datasets affected were February through and including May of 2015.

In addition, the source statewide May Sales dataset was re-extracted by SDAT to correct 19 corrupted records that were detected at the same time as the above issue. Because the statewide May Sales dataset was re-extracted in July, the dataset will contain additional records with transaction dates of 5/2014 through 4/2015 which have been added to the dataset since the original statewide May Sales dataset was extracted on 5/10/2015.
