ANGELO A. ZAMBETTI

December 31, 2012

Richard Hall  
Maryland Department of Planning  
301 West Preston Street, Ste. 1101  
Baltimore MD 21201-2305

Mr. Hall,

Enclosed please find the City of Taneytown's Septic Tier map as required by SB236. We are also submitting the supporting shape file electronically to MDP. As the City of Taneytown does not provide water or sewer services beyond the corporate limits, and does not allow continued use of private wells or septic systems (once the municipal infrastructure reaches such properties) within the City; our map is rather straightforward, with areas being either served, or planned for service. We do have several City parks designated as tier IA to help differentiate those areas from more typical usage areas for planning purposes.

As the sewer and septic policies noted above, were previously adopted by the City Council, the City has decided to adopt the tiers administratively, rather than through a resolution, better enabling us to meet the December 31, 2012 deadline as the legislation provided.

Please feel free to contact me with any questions or comments on the enclosed map.

Sincerely;

A handwritten signature in blue ink, appearing to read "H. C. Heine Jr.", is written over the typed name and title.

Henry C. Heine Jr.  
City Manager
