Area Name: State Legislative District 33 (2010), Maryland

| Subject | Subject State Legislative District 33 (2010), Maryland | | | aryland |
|---|--|-----------------|---------|----------------|
| | Estimate | Estimate Margin | Percent | Percent Margin |
| | | of Error | | of Error |
| Median (dollars) | \$1,622 | +/- 81 | (X)% | +/- (X) |
| No rent paid | 410 | +/- 166 | (X)% | +/- (X) |
| | | | | |
| GROSS RENT AS A PERCENTAGE OF HOUSEHOLD INCOME (GRAPI) | | | | |
| Occupied units paying rent (excluding units where GRAPI cannot be computed) | 5,314 | +/- 434 | 100.0% | +/- (X) |
| Less than 15.0 percent | 638 | +/- 206 | 12% | +/- 3.7 |
| 15.0 to 19.9 percent | 660 | +/- 207 | 12.4% | +/- 3.8 |
| 20.0 to 24.9 percent | 813 | +/- 233 | 15.3% | +/- 4.1 |
| 25.0 to 29.9 percent | 779 | +/- 245 | 14.7% | +/- 4.5 |
| 30.0 to 34.9 percent | 642 | +/- 188 | 12.1% | +/- 3.3 |
| 35.0 percent or more | 1,782 | +/- 261 | 33.5% | +/- 4.8 |
| Not computed | 439 | +/- 171 | (X)% | +/- (X) |

Data are based on a sample and are subject to sampling variability. The degree of uncertainty for an estimate arising from sampling variability is represented through the use of a margin of error. The value shown here is the 90 percent margin of error. The margin of error can be interpreted roughly as providing a 90 percent probability that the interval defined by the estimate minus the margin of error and the estimate plus the margin of error (the lower and upper confidence bounds) contains the true value. In addition to sampling variability, the ACS estimates are subject to nonsampling error (for a discussion of nonsampling variability, see Accuracy of the Data). The effect of nonsampling error is not represented in these tables.

The median gross rent excludes no cash renters.

In prior years, the universe included all owner-occupied units with a mortgage. It is now restricted to include only those units where SMOCAPI is computed, that is, SMOC and household income are valid values.

In prior years, the universe included all owner-occupied units without a mortgage. It is now restricted to include only those units where SMOCAPI is computed, that is, SMOC and household income are valid values.

In prior years, the universe included all renter-occupied units. It is now restricted to include only those units where GRAPI is computed, that is, gross rent and household Income are valid values.

The 2007, 2008, 2009, 2010, 2011, and 2012 plumbing data for Puerto Rico will not be shown. Research indicates that the questions on plumbing facilities that were introduced in 2008 in the stateside American Community Survey and the 2008 Puerto Rico Community Survey may not have been appropriate for Puerto Rico.

Median calculations for base table sourcing VAL, MHC, SMOC, and TAX should exclude zero values.

While the 2008-2012 American Community Survey (ACS) data generally reflect the December 2009 Office of Management and Budget (OMB) definitions of metropolitan and micropolitan statistical areas; in certain instances the names, codes, and boundaries of the principal cities shown in ACS tables may differ from the OMB definitions due to differences in the effective dates of the geographic entities.

Estimates of urban and rural population, housing units, and characteristics reflect boundaries of urban areas defined based on Census 2000 data. Boundaries for urban areas have not been updated since Census 2000. As a result, data for urban and rural areas from the ACS do not necessarily reflect the results of ongoing urbanization.

Source: U.S. Census Bureau, 2008-2012 American Community Survey

Explanation of Symbols:

- 1. An '**' entry in the margin of error column indicates that either no sample observations or too few sample observations were available to compute a standard error and thus the margin of error. A statistical test is not appropriate.
- 2. An '-' entry in the estimate column indicates that either no sample observations or too few sample observations were available to compute an estimate, or a ratio of medians cannot be calculated because one or both of the median estimates falls in the lowest interval or upper interval of an openended distribution.
 - 3. An '-' following a median estimate means the median falls in the lowest interval of an open-ended distribution.
 - 4. An '+' following a median estimate means the median falls in the upper interval of an open-ended distribution.
- 5. An '***' entry in the margin of error column indicates that the median falls in the lowest interval or upper interval of an open-ended distribution. A statistical test is not appropriate.
 - 6. An '*****' entry in the margin of error column indicates that the estimate is controlled. A statistical test for sampling variability is not appropriate.
- 7. An 'N' entry in the estimate and margin of error columns indicates that data for this geographic area cannot be displayed because the number of sample cases is too small.
 - 8. An '(X)' means that the estimate is not applicable or not available.
