

**U.S. Census Bureau**
**American Community Survey Multi-Year Profile 2004 - 2000**
**United States**

An \* indicates that the estimate is significantly different (at a 90% confidence level) than the estimate from the most current year. A 'c' indicates the estimates for that year and the current year are both controlled; a statistical test is not appropriate.

NOTE. Data are limited to the household population and exclude the population living in institutions, college dormitories, and other group quarters.

**TABLE 1. PROFILE OF GENERAL DEMOGRAPHIC CHARACTERISTICS**

American Community Survey Multi Year Profile: United States

Data are based on a sample and are subject to sampling variability. The degree of uncertainty for an estimate arising from sampling variability is represented through the use of a confidence interval. The interval shown here is a 90 percent confidence interval. The stated range can be interpreted roughly as providing a 90 percent probability that the interval defined by the lower and upper bounds contains the true value. In addition to sampling variability, the ACS estimates are subject to nonsampling error (for a discussion of nonsampling variability, see Accuracy of the Data). The effect of nonsampling error is not represented in these tables.

(Note: Table 1,2,3,4)

The number of householders does not necessarily equal the number of households because of differences in the weighting schemes for the population and occupied housing units.

(Note: Table 1,3)

For more information on understanding race and Hispanic origin data, please see the Census 2000 Brief entitled, Overview of Race and Hispanic Origin, issued March 2001. <http://www.census.gov/prod/2001pubs/c2kbr01-1.pdf>

(Note: Table 1)

Ancestry listed in this table refers to the total number of people who responded with a particular ancestry; for example, the estimate given for Russian represents the number of people who listed Russian as either their first or second ancestry. This table lists only the largest ancestry groups; see the Detailed Tables for more categories. Race and Hispanic origin groups are not included in this table because official data for those groups come from the Race and Hispanic origin questions rather than the ancestry question (see Table 1).

(Note: Table 2)

The Census Bureau introduced a new skip pattern for the disability questions in the 2003 ACS questionnaire. This change mainly affected two individual items -- go-outside-home disability and employment disability -- and the recode for disability status, which includes the two items. Accordingly, comparisons of data from 2003 or later with data from prior years is not recommended for the relevant questions. For more information, see the ACS Subject Definitions for disability at <http://www.census.gov/acs/www/UseData/Def.htm>.

(Note: Table 2)

Data for year of entry of the native population reflect the year of entry into the U.S. by people who were born in Puerto Rico, U.S. Island Areas or born outside the U.S. to a U.S. citizen parent and who subsequently moved to the U.S.

(Note: Table 2)

Employment and unemployment estimates may vary from the official labor force data released by the Bureau of Labor Statistics because of differences in survey design and data collection. For guidance on differences in employment and unemployment estimates from difference sources go to <http://www.census.gov/hhes/www/laborfor/laborguidance082504.html>.

(Note: Table 3)

Occupation codes are 4-digit codes, but are still based on Standard Occupational Classification 2000.

(Note: Table 3)

Industry codes are 4 digit codes and are based on the North American Industry Classification System 2002. However, the Industry categories adhere to the guidelines issued in Clarification Memorandum No. 2, "NAICS Alternate Aggregation Structure for Use By U. S. Statistical Agencies," issued by the Office of Management and Budget.

(Note: Table 3)

Workers include members of the Armed Forces and civilians who were at work last week

(Note: Table 3)

For the characteristic Selected Monthly Owner Costs as a Percentage of Household Income, the percent distributions are calculated based on the total number of Owner-occupied Housing Units With a Mortgage and Owner-occupied Housing Units Without a Mortgage minus the number of Owner-occupied Housing Units in the not computed category.

(Note: Table 4)

The median gross rent excludes no cash renters.

(Note: Table 4)

For the characteristic Gross Rent as a Percentage of Household Income, the percent distributions are calculated based on the total number of Renter Occupied Units minus the number of units in the not computed category.

(Note: Table 4)

For the characteristic Gross Rent, the percent distributions and medians are calculated based on the total number of Renter Occupied Units minus the number of units in the no cash rent category.

(Note: Table 4)

1. An '-' entry in the estimate column indicates that no sample observations were available to compute an estimate.
2. An '-' following a median estimate means the median falls in the lowest interval of an open-ended distribution.
3. An '+' following a median estimate means the median falls in the upper interval of an open-ended distribution.
4. An 'N' entry in the estimate, lower bound, and upper bound columns indicates that data for this geographic area cannot be displayed because the number of sample cases is too small.
